

# FOR PRODUCTIVITY, CONVENIENCE AND SECURITY Shur-Link Pro™ LED Power Display

## Real-Time Feedback and On-Board Diagnostics

A016FL-1111

**High-intensity LEDs indicate end of travel for motorized systems and continuously monitor motor current for active motor protection. On-board diagnostics quickly pinpoint the cause of unintended operation, helping prevent damage to any connected systems.**

Easy-to-read displays and quick connections make using the Shur-Link Pro™ a snap. The red-lettered power display provides real-time current readings while the indicator logo lights up when the system is in use and flashes when current usage begins to peak. This helps prevent motor burn-out and lets the operator keep track of what is happening from the cab. Simply turning your Shur-Link Pro™ off acts as a master disconnect feature, cutting the power to your trailer manually or by remote.

The unit is housed in an attractive, high-impact cover with Shur-Co® logo and high-intensity LED lights. The Shur-Link Pro™ can be mounted on the inside or outside of the trailer. Multiple-channel capacity allows the addition of more systems down the road, up to five in all.
