

WIDE-OPEN LOADING AT THE PULL OF A ROPE Turning Point™ Bow System

Bows Swing Up and Completely Out of the Way

A0017FL-1011

Our exclusive Turning Point™ bow system is controlled with a pull of the rope, while the operator remains safely on the ground. All of the bows move as one, in a single motion, swinging up and over loads without binding. Reverse swing bows are also available.

A center pivoting ridgepole holds the tarp without sagging, so you need fewer bows for support. Angled brackets allow the bows to move freely, for a smooth operation from start to finish. The patented locking system provides secure support during transport and serves as a skid plate when the bows swing closed.
