

# BOWS SWING UP AND OUT OF THE WAY FOR LOADING Electric Turning Point™ Bow System

## Bows Open for Loading at the Touch of a Button

A0018FL-1011

Our exclusive Electric Turning Point™ bow system is controlled with the touch of a rocker switch or remote, while the operator remains comfortably and safely in the cab. All of the bows move as one, in a single motion, swinging up and over loads without binding.

Our exclusive Turning Point™ bow system, which moves the bows out of the way for loading with the pull of a rope, is now available in an electric upgrade. As in the manual version, the system's pivoting ridgepole holds the tarp without sagging, so you need fewer bows. Angled brackets allow the bows to move freely, for a smooth operation from start to finish. The locking system provides secure support during transport and serves as a skid plate when the bows swing closed.

**Key Features:** Electric Cut-Off Switch, Automatic Overload Slip-Clutch, Actuator Brakes, Easy Electric-to-Manual Conversion, Locking Skid Plates, Bow Actuator.
