ELECTRIC GATE AND HOIST

SHURCO

AGRICULTURE DIVISION

REMOTELY CONTROL BOX HOISTS/SLIDE GATES

A029FL-1215

Now you can control the box hoist and rear slide gate on your farm bodies with Shur-Co's exclusive SMART2™ remote. The versatility of the system also allows you to add an electric tarp, electric hopper opener, LiteALL™ worklights – even a swing auger drive kit that can be controlled from the same remote. It's fast, easy and, most importantly, SAFE!

With the introduction of Shur-Co's SMART™ mini-modules, you have the ability to control any 12-volt accessory on your truck or trailer. The combination of the mini-module and an electric actuator gives you full control over the rear slide gate. A second mini-module with our electric-over-air sole-noid valve gives you control of your hoist. No more climbing up and down bins to adjust flow from the truck into your auger.

SMART-touch™ control!
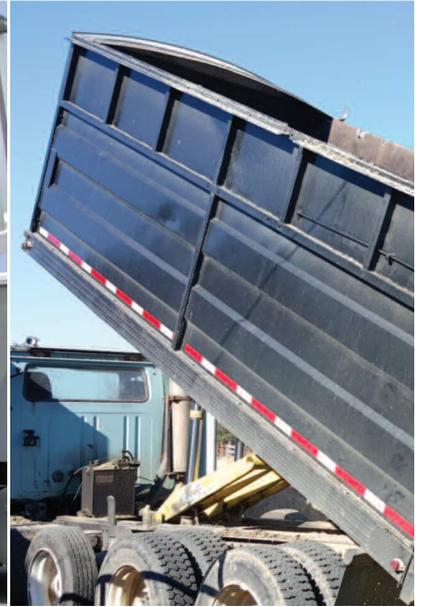

BUILT TO LAST, WITH SHUR-CO® DEPENDABILITY

Shur-Co's electric gate and hoist system stands up to the rigors of hard work and the daily grind. All the connections utilize weather pack connections – environmentally sealed and able to withstand the elements of extreme temperatures, moisture and corrosive road treatments.

Also included as standard are D.O.T.-certified air fittings that are quick locking for convenience. Adding an electric tarp or a LiteALL™ work light package? Those will come with our patented SMARTwire™ package for easy plug-and-play installation.

SMART1 + ™ remote version coming soon!
