

SHURTITE

RETRACTABLE TARP SYSTEMS

SHURTITE™ RETRACTABLE TARP

SAFE, FAST & LIGHTWEIGHT CUSTOMIZABLE TARPING

- **SAVES TIME & MONEY:** One-person operation of entire system in minutes.
- **REDUCES INJURY:** System opens and closes safely from the ground.
- **LIGHTWEIGHT & AERODYNAMIC:** Adds just over 1,500 lbs. to a 48-ft. flatbed.
- **VERSATILE & COMPACT:** Compresses to 8 ft. long, locks to any spot on track.
- **CONVENIENT:** Dozens of standard configurations for flatbeds, trucks and trailers.
- **CUSTOMIZABLE:** Our in-house engineering staff will design to meet your needs.
- **BEST BUILT:** Top-quality aluminum and tarp materials, strict manufacturing standards.
- **BEST BACKED:** Carries an end-to-end 2-year parts and labor warranty.

490 Elgin St., Unit #1 | Brantford | Ontario, Canada N3S 7P8 | 800-265-0823

TRACK

Extruded aluminum track flexes with trailer and resists side impact. An easy-to-replace interior polymer strip cuts down on excessive wear.

BOWS & LIFTERS

Modular high-strength aluminum bows allow quick, easy repairs without welding. Cast aluminum corners with 3-in. radius and anodized aluminum hinged lifters take up minimal space.

WHEELS

Main rolling wheels and horizontal guide wheels rotate on sealed bearings for ease of operation and much less maintenance – no more axle greasing!

ALUMINUM HEADBOARD

Reinforced with 2 vertical posts for added strength, with LED marker lights for improved nighttime visibility. Many optional configurations are available, like man doors, steps, nose cone, etc.

TARP

Multipanel tarp of highest-quality 22-oz. high-gloss fabric is reinforced with a second layer at stress points. Available in 40 colors with optional print graphics.

TENSIONING DEVICE

Sliding front lock assembly makes for smooth operation and allows system to be opened from front of trailer for added versatility. An optional vertical tensioning device is also available.

SHURTITE

RETRACTABLE TARP SYSTEMS

PNEUMATIC LOCK BRACE TENSIONING

THE PATENTED PNEUMATIC TARP TENSIONING SYSTEM

- **RELIABLE:** Field-tested over 2 winters, in temperatures as low as -45° below zero.
- **OPENS FROM THE FRONT:** No need to open rear of trailer.
- **FAST & EASY:** No ratchets, straps or cranks to get lost or misplaced.
- **EASE OF OPERATION:** Headboard controls in a durable weatherproof enclosure.
- **LIGHTWEIGHT:** About the same as winding lock brace or posts and ratchets.
- **REMOVABLE:** Easy to remove during loading or unloading, if required.
- **RETROFITS:** Ties into existing ratchet and post or winding brace tensioning systems.
- **AVAILABLE OPTIONS:** Pneumatic fuse, temporary manual op tool or remote air supply.

WHEN ORDERING YOUR SHURTITE™ TARPING SYSTEM:

All ShurTite™ tarps are custom-made to order and are non-returnable. Correct physical measurements are essential for proper tarp fit. Provide all requested information on a detailed measurement sheet or your order may be delayed.

DO NOT use universal body or trailer sizes; use actual measurements. Body or trailer size and finished tarp size are NOT the same.

Choose the detailed measurement sheet that best fits your trailer body. Provide all measurements in INCHES.

Trailer MUST BE AIRED UP and fifth-wheel height set from ground BEFORE measurements are taken and recorded. Width of deck is from outside of rub rail to outside rub rail. Add any special instructions that we will need to know concerning your order.
