

Why are the new Easy-Off Tarp Stops better than the old ones?

Shur-Co's new **Easy-Off Tarp Stops** have been redesigned to extend the life of both the stop and tarp by reducing friction. Other changes include the stop's reduced draft angle and patented curved end; these help to decrease the amount of rubbing and potential damage to the tarp when it is rolled up against the stops. This stop is constructed of an improved cast aluminum alloy for increased corrosion resistance while maintaining necessary strength.

In addition to the curved end, the updated standard style stop (old P/N 1100834, now P/N 1705775) is now slightly taller to match the 6-inch offset style. The 6-inch offset style (old P/N 1105168, now P/N 1705454) is also redesigned but as a die-cut part – to improve the surface finish and appearance.

These redesigned tarp stops (*see illustration at left*) are interchangeable with our original ones. Those older tarp styles (*see illustration below left*) will be available for a limited time but only as replacement parts. All new kits will contain the updated styles.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at www.shurco.com.

Top: Shur-Co's redesigned Easy-Off Tarp Stop, with its taller height and patented curved tip, helps prevent rubbing against the tarp. Bottom: The 6-inch offset style has also been updated for the same advantage.
