

Why should I upgrade to the molded resin Durabow™?

If you're hauling free-flowing aggregates like sand and gravel, **Durabow™** is an affordable way to reduce damage from bucket loaders. Its durable molded resin construction provides just enough give that the bows can be left on during loading. The bows actually flex as the load is dumped, then spring back up to support the tarp. It's a great way to save time and labor.

What regular bow covers do for standard bows, **Diamondback Bow Socks** do for the **Durabow™**. Slip them on to prevent pitting in the bow surface that can cause premature tarp wear.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at www.shurco.com.

Top: Durabow™ flexes to reduce damage from bucket loaders and can be left on during loading.

Above: Diamondback Bow Socks give added protection, keeping the bows' surface smoother and less pitted.
