

How to choose: Shur-Return™ or Cable Return?

If you are looking to upgrade from the standard stretch cord return, you have two choices. Instead of the stretch cord guiding the roll tube over the end cap, with a protective cover to keep the rope from fraying, the **Shur-Return™** features a heavy-duty steel tension spring and 1/4-inch non-stretch solid braid rope.

Your other choice is the **Cable Return**, which can be used on either the front or the back of the trailer with aluminum, galvanized steel or stainless steel caps (not available for use with fabric caps). The heavy-duty internal tension spring-and-pulley system makes use of a non-stretch cable with an available extension piece of roll tube to hold/prop the cable in place.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at www.shurco.com.
