

## What are some of Shur-Co's latest and greatest products?

Here at Shur-Co®, we are constantly striving to improve our products to better suit your needs. Some of the latest introductions are pictured at the left and are described below.

**Adjustable Bow.** With the ability to adjust the bows' width without cutting or welding the loose shank, these bows install in a fraction of the time needed for standard steel bows. A 5/16-inch bolt is used to secure the 7-inch adjustable shank once the proper width has been determined.

**Combo End Cap.** The front of this tarp seals on an arched aluminum surface, providing an improved seal over fabric on fabric. There is also less potential for wear, which can help to extend the life of your tarp.

**Easy-Off Belt Flex Tarp Stop.** Belted design allows high-sided trailers to pull through low-clearance areas without damaging the tarp stops. It provides a ridged stop for the tarp to rest against in the open position while letting the stop flex when needed. Remember that the tarp should never be left in the open position during transport as this could allow it to become loose and blow off the trailer.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at [www.shurco.com](http://www.shurco.com).

*Top: Shur-Co's adjustable bow allows you to adjust the bow width without cutting or welding. Left inset: The combination cap provides a tight seal and reduces wear on the fabric portion. Right inset: New belted design allows the tarp stop to flex in low-clearance situations.*
