

## Why are the hole openings on my tarp stop bodies different?

Shur-Co® has taken feedback from our customers and made an improvement to our **Easy-Off Tarp Stop** bodies. These previously had a set of six holes for universal mounting on different applications, with a fixed center-to-center alignment of 1-1/4 inches. However, it was brought to our attention that many of our competitors use a smaller center-to-center distance for tarp stop bodies, so replacement with Shur-Co® stops was sometimes difficult. To resolve that problem, we changed our design, replacing each of the fixed bolt holes with a slot that is more universally compatible, for more convenient replacement.

Shur-Co® takes product design specifications very seriously, and we continuously strive to provide the best-engineered systems and replacement parts for our customers. Your comments and feedback help us in achieving that goal. Please continue to let us know how we are doing.

For additional information about Shur-Co® products, give us a call at **1.800.474.8756** Monday through Friday, from 8:00 a.m. to 5:00 p.m. Central Time. Our friendly and knowledgeable Customer Service Representatives will be happy to answer your questions. Or log on to our website at [www.shurco.com](http://www.shurco.com).
