

# 5000X

## STEEL ARM TARP SYSTEM

D005FL-0318

### STANDARD FEATURES

- Tarp Spool with Side Plates
- Steel Roller Bar
- 1-1/4" Square Arms - 2-Piece Galvanized
- Flat Coil Springs (3)
- Cab-Level Crank - Standard for P/N 1803906
- Ground-Level Crank - Standard for P/N 1803902
- Durabuilt™ Motor - Standard for P/N 1803895
- Rotary Switch - Standard for 1803895

### THE ECONOMICAL CHOICE

The most popular line of economical, yet dependable, front-to-rear tarp systems, the 5000X is available in a wide variety of models, differentiated by cab- or ground-level manual cranks or Durabuilt™ direct-drive motor. All feature zinc-plated steel tubing and easy-to-mount, low-profile flat-coil torsion springs. The zinc coating prevents rust and enhances the 5000X professional look.

### FITS BOXES & TRAILERS - UP TO 16'

Complete system part numbers with options.

PART NO.	KIT NAME	ARMS	DRIVE	SPRINGS	ELECTRICS
1803906	5000XCL	Galvanized	Cab Level	Flat Coil - 3	N/A
1803902	5000XGL	Galvanized	Ground Level	Flat Coil - 3	N/A
1803895	5000XEL	Galvanized	Electric	Flat Coil - 3	Rotary Switch

#### Economical and Reliable

The 5000X uses a 1-1/4-inch square steel tube pivot arms and bent arms for a lower profile, creating a reliable yet economical choice for any operation.

#### Pivot Rest

Pivot arm rests are standard with the 5000XEL Series. The arm rest creates a steadier arm while in the locked position and helps keep the arm from bouncing during transportation.

#### Huge Tarp Selection

Choose from heavy-duty mesh, multicolored PVC mesh, 18-oz. vinyl or asphalt lumite. Asphalt lumite is water resistant and not PVC coated, so it's able to handle much higher heat levels than vinyl. In addition to lumite, other asphalt-friendly selections are also available, including RFL, urethane-coated airbag, 22-oz. vinyl and doloprene.
