

AUTOTRAP™ ELECTRIC HOPPER OPENER

AGRICULTURE DIVISION

MORE COMPACT SIZE, HIGHER CLEARANCE

A014FL-0518

AutoTrap™ combines all of the best elements of Shur-Co® SMARTrailer™ design! You get a compact, high-clearance system at an affordable price, with patented SMARTwire™ connections and built-in compatibility with our SMART2™ or SMART3™ remote.

The thru-bore motor design of the AutoTrap™ has performance characteristics comparable to our ProTrap® system, but in a more compact size and weight – nearly 40% lighter! This design also allows for easy one-bolt conversion to manual operation, if necessary. The protective polymer sleeve acts as a corrosion barrier between drive shaft and motor.

This system has a one-size-fits all design to interface with 1", 7/8" or 3/4" crank shafts. Wireless operation via pre-programmed SMART2™ or SMART3™ remote is standard while push-button controls at each opener are also included. Available in 1-hopper, 2-hopper, 3-hopper and 4-hopper stand-alone configurations or in combination with 4500 Series HD electric tarps.

Key Features: Integrated Rock Shield, Thru-Bore Motor, Protective Motor Sleeve, Thru-Bore Manual Drive Shaft w/3/4" Hex Milled End, Universal Mounting Bracket, Crank Shaft Adapter Kit, 1-Bolt Manual Changeover, Emergency Back-Up Crank, SMARTwire™ Sealed Harness, SMART2™ or SMART3™ Remote.
