

SMART2™ REMOTE

A016FL-0620

FEATURES AND BENEFITS

- SMART2™ Remote w/Rechargeable Lithium Battery
- Charging Cradle
- 12-Volt Car-Style Charging Cable.

The latest in SMART-touch technology! Our SMART2™ remote provides precision Express Mode control of our complete SMARTrailer™ line, displaying real-time positioning of tarp and traps and allowing you to operate over 100 devices from a distance of more than 100' away.

Operate Shur-Co's 4500 Series HD, AutoTrap™, ProTrap®, Electric Gate and Hoist, DriveMaxx™ auger drive and LiteAll™ LED work lights in any combination – all from the comfort of your cab. It's advanced motor protection – you know right away if a motor slows or stalls. And it's safe! The SMART2™ has a built-in emergency shut-off; close the flip-style lid and whatever is running stops immediately. This remote is constructed of impact-resistant ABS plastic and features a 2-1/2" digital screen that is backlit for night operation. The SMART2™ doesn't just open or close chosen applications – it lets you specify exact positioning! Automatically open tarps away from the stops to save on wear and tear and maintenance downtime. Or open traps based on capacity of the elevator pits.
