

# GATE AND HOIST ELECTRIC SYSTEM

AGRICULTURE DIVISION

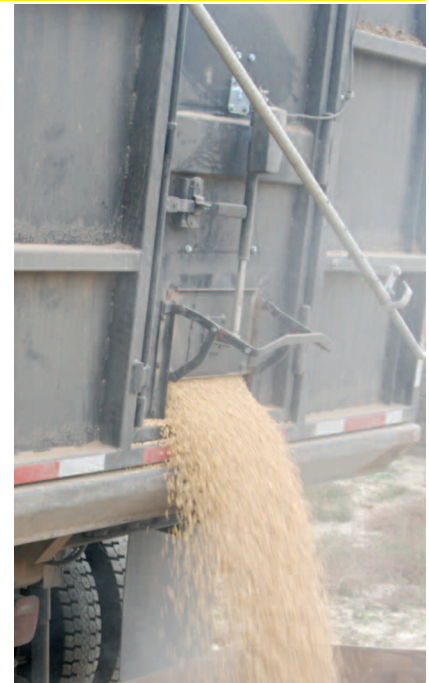

## NO MORE CLIMBING BINS TO ADJUST GRAIN FLOW

A029FL-0518

Remotely control the box hoist and rear slide gate on farm bodies with our SMART2™ and SMART3™ remotes. Makes the harvest faster, easier and, most importantly, safer.

Shur-Co's SMART™ mini-modules give you control of any 12-volt accessory on your truck or trailer. The combination of mini-module and an electric actuator powers the rear slide gate. A second mini-module with our electric-over-air solenoid valve lets you control your hoist. (See on reverse side.)

Built with legendary Shur-Co® dependability – stands up to the rigors of hard work and the daily grind! Weather-pack connections are sealed to withstand extreme temperatures, moisture and corrosive road treatments. D.O.T.-certified air fittings have a convenient quick-lock design for easy install.
