

# TRAP-EZE™

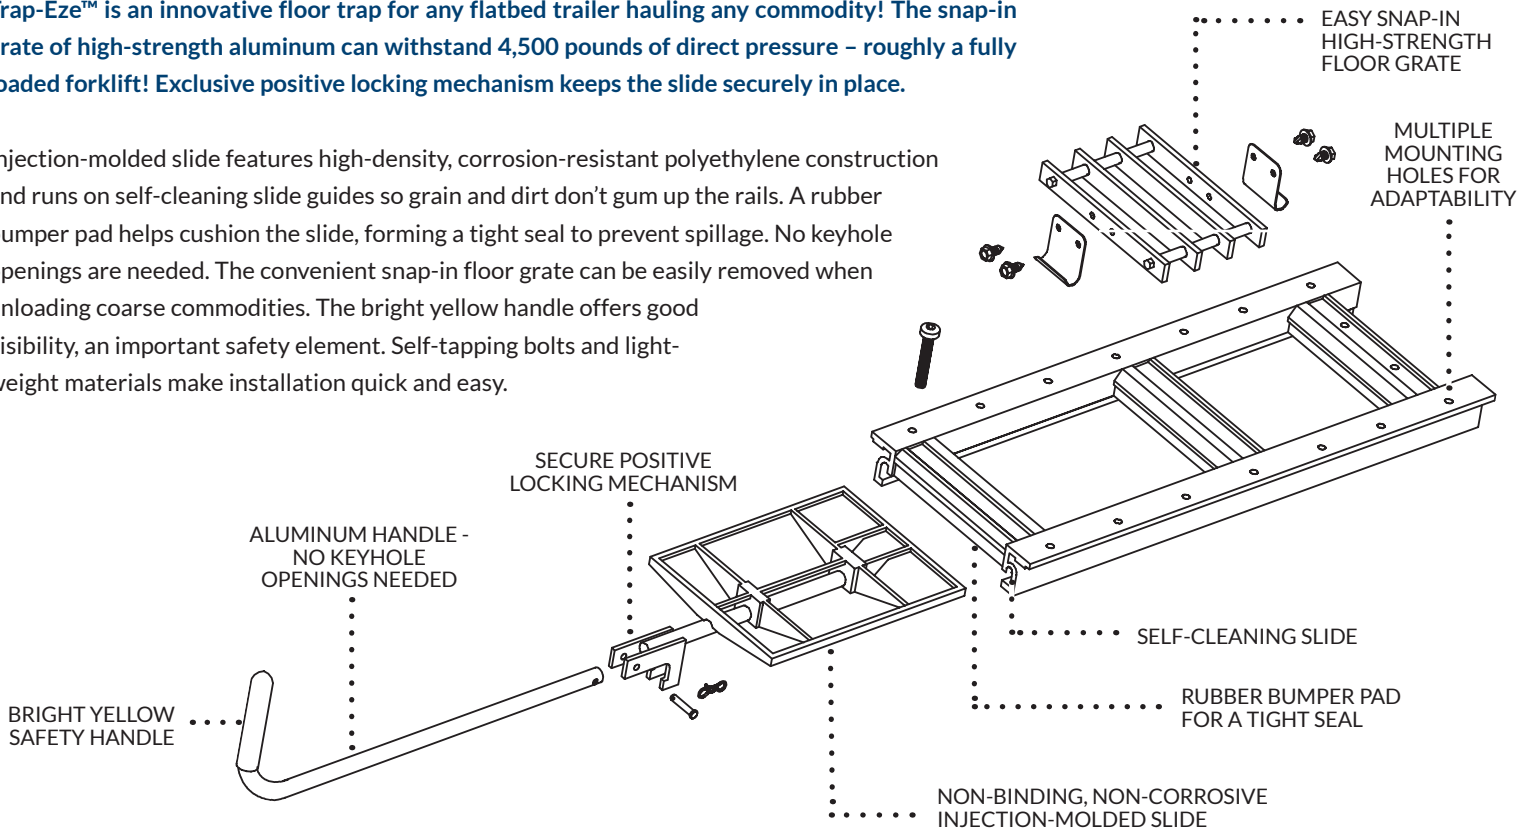

## FLOOR TRAP

A031FL-0620

Trap-Eze™ is an innovative floor trap for any flatbed trailer hauling any commodity! The snap-in grate of high-strength aluminum can withstand 4,500 pounds of direct pressure – roughly a fully loaded forklift! Exclusive positive locking mechanism keeps the slide securely in place.

Injection-molded slide features high-density, corrosion-resistant polyethylene construction and runs on self-cleaning slide guides so grain and dirt don't gum up the rails. A rubber bumper pad helps cushion the slide, forming a tight seal to prevent spillage. No keyhole openings are needed. The convenient snap-in floor grate can be easily removed when unloading coarse commodities. The bright yellow handle offers good visibility, an important safety element. Self-tapping bolts and light-weight materials make installation quick and easy.
