

SMART3™

SMART-TOUCH REMOTE

A033FL-0620

FEATURES AND BENEFITS

- SMART3™ Remote w/Rechargeable Lithium Battery
- 12V Car-Style Charging Cable
- Improved Range
- Bluetooth Compatibility

In designing the SMART3™ remote, we took feedback and customer requests and engineered the simplest, best-performing SMARTrailer™ accessory Shur-Co® has to offer! The same popular features as the SMART1+™, plus additional features like improved range and Bluetooth compatibility.

First, you get 5-channel operation: Use the Select button to switch between applications – the active channel will light up. You can turn off any unused channels, and the flip-style lid shuts off after 3 minutes of inactivity. Configure it to Momentary Mode (press-and-hold) or Express Mode (auto press-and-release). The SMART3™ turns off automatically if a stall condition is detected. Now for the extras! Range has increased to that of the SMART2™. Plus, you can update and customize devices with your Smartphone or tablet – get and use the SMART app by accessing the QR codes at right. The SMART3™ easily pairs with external receiver buttons – no need to remove receiver cover! Use the SMART3™ to run Shur-Co's 12-volt electric accessories in any combination.
