

4500 SERIES HD

ELECTRIC TARP

A012FL-0620

FEATURES AND BENEFITS

- Spiral Spring Return
- HD Front/Rear Extruded Aluminum Torsion Arms w/ Flex-Elbow and Boot
- Dual-Pivot Motor Mount
- Sealed Control Box
- SMARTwire™ Sealed Harness
- SMART2™ or SMART3™ Remote

Available for all trailer makes and models! The 4500 Series HD features a powerful American-made motor with all-metal gearbox and an incredibly reliable magnetic brake. Heavy-duty torsion arms are equipped with spiral-reinforced elbows for flexibility to move smoothly over loads. The 4500 Series HD produces optimal rather than increased torque (which can harm your system). No electrical energy is used to actuate the brake – no electrical connections to misfire! A patented dual-pivoting motor mount allows for any misalignment of the roll tube without stress to the system. Extruded aluminum torsion arms are the strongest in the industry, backed by a lifetime warranty. Arms come preassembled with a super-sturdy mounting bracket (no backer plate needed in most instances). The roller bearing-style rear arm bracket has a low-friction design that won't wear out. Both arms are inset to prevent obstruction of clearance lights. An improved rubber boot on the flex-joint guards against damage from field and road debris. An additional flex-joint, called the Gate Flex™ option, bypasses side-mount and top-mount hinges to accommodate tailgates. A protective bolt-on shroud offers easy motor access.
