## WHAT OUR CUSTOMERS SAY

“ I am 100% satisfied with Shur-Co®. As far as I'm concerned, there is only one tarp on the market! I've been farming for 25 years, and I've got Shur-Loks on my hopper-bottom trailers, seed wagons and grain carts. I'm an honest type of fellow and would be happy to tell you if your product could be improved upon, but I can't think of a thing!”

– Don Richey, Cypress Creek Farms, Central City, KY

“ It's like I'm always telling my customers, 'Buy the best or I'll fix the rest.' Whenever someone asks for my recommendation, I say, 'Put on a Shur-Co®; you won't be back for repairs.' Then I say, 'But I'll be glad to fix the other brands – it's up to you.' Also, my customers love the ease and convenience of your SMARTrailer™ electric accessories!”

– Tim Harms, President, Harms Trucking Co., Minooka, IL

“ The Shur-Co® representative that I spoke with on the phone was well educated on many aspects of the Shur-Co® product line, as well as their replacement parts, which didn't leave me struggling to explain or second guessing myself. I can't say enough great things about Shur-Co®. Every single experience I've had with them has been excellent!”

– Tyler Volp, K&D Rivers, Omro, WI

“ I've always held Shur-Co® products in the highest regard. With my technical background, I am especially pleased that, when the company introduces a new product, it's always engineered right the first time. This means their customers will get the best possible performance, something that's not always true with other brands.”

– Greg Smith, Triangle Truck Center, Monroe, WI

“ I have used Shur-Co® and have seen firsthand the importance they place in regards to getting my equipment in and repaired and back on the road. As a business owner, it is important to me to have such a relationship with a business that puts quality not only in their products, but in their customer service as well.”

– Brad Olek, BJC Industries, Moorhead, MN

“ I have been amazed at the professional service I have received from Shur-Co® – nice people to deal with and very fast delivery! A lot of vendors nowadays lack in customer service, but I found Shur-Co's customer relations business plan matched mine. I have been purchasing tarps and supplies from Shur-Co® for close to 20 years. Neither myself nor my purchasing agents have ever had a confrontation or elevated issue. Any problems were handled with a professional attitude and corrected in a manner that satisfied both parties. The quality of Shur-Co's materials and workmanship has been top notch. It's been an excellent business relationship, to say the least.”

– Mark O'Nory, Industrial Transportation Services, Golden, CO

“ I ordered an Original Shur-Lok® tarping system, and it arrived exactly as scheduled. And once the system was installed on my grain cart, it worked very well. All necessary parts and instruction were there, and the Shur-Co® rep that I worked with was very knowledgeable and helpful.”

– Darrin Marshall, Rio, WI

“ The Shur-Co® representative that I spoke with on the phone was extremely helpful at making sure I had the right measurements for my Original Shur-Lok®, and the system was shipped to me very quickly. Just all around, I've received great customer service from Shur-Co®.”

– Matt Cavenee, Miller, SD

## COMPANY TIMELINE

- 1954** A shoe repair shop opens in Wahpeton, ND, moves into tarp repair and then new tarps.
- 1969** Growing tarp demand results in the creation of Wahpeton Canvas Company (WCCO).
- 1980** The Original Shur-Lok® roll tarp is born. The simple, yet reliable invention revolutionizes the tarping industry.
- 1992** The truck cover division of the company splits off from WCCO and relocates to Yankton, SD.
- 1996** A name change to Shur-Co® more closely identifies the company with the Shur-Lok®, its best-known product.
- 2000** Shur-Co® enters the auto accessories field with its TruXedo® line (to be spun off as its own company in 2007 under new ownership).
- 2001** Acquisition is made of a highly automated metal fabrications operation.
- 2003** Shur-Co® is named South Dakota's Family Business of the Year.
- 2006** Shur-Co® moves into trailer automation with the launch of the 3500 Series electric upgrade for the Shur-Lok®. Like the introduction of the Shur-Lok® itself, 40 years ago, the 3500 is unlike anything in the electric tarp market.
- 2008** State-of-the-art expansion allows Shur-Co® to keep up with increasing product demand, bringing the company's total manufacturing area to 150,000 square feet.
- 2009** The ProTrap® electric hopper opener and five-channel SMARTransmitter® are launched to complement the 3500, for an expanded line of SMARTrailer™ products.
- 2010** Shur-Co®, LLC is formed with the existing management team, sparking unprecedented growth and global market expansion.
- 2012** More products join the Shur-Co® lineup: SMART2™ and SMART1+™ remotes, 4500 Series HD electric tarp, LiteALL™ work lights, DuraPull™ semi-auto pull tarp and IronSide™ side dump system. Later in the year, Shur-Co® acquires Donovan Enterprises, a top name in waste and construction tarp systems, with locations in Michigan, Florida and the UK – positioning Shur-Co® for global growth.
- 2014** Roll-Tite™ is acquired and rebranded as ShurTite™ – an industry-leading retractable tarp system for flatbed trailers, dropdecks, straight trucks and specialty vehicles.
- 2015** Global expansion continues as Shur-Co® sells products to over 30 countries on 6 continents.
- 2016** Growth continues as a branch dedicated to ShurTite™ installs and repairs opens in Sioux Falls, SD. Shur-Co® of ND moves into a new 24,000 square foot facility in West Fargo with increased installation capabilities and better product distribution. Shur-Co® of IL, having outgrown its previous location, relocates to a new 16,000 square foot facility in Decatur, adding ShurTite™ installs to its shop activities.
- 2017** Shur-Co® rolls out its SWAT™ system for roll-off trucks and trailers in the waste market and the Tater-Top™ roll tarp for potato trailers. The company also celebrates 25 years in its Yankton, SD location.
- 2018** Shur-Co's continued focus on innovation adds additional products to its SMARTrailer™ line: the Electric Gate and Hoist and DriveMaxx™ Swing Auger Drive Kit.
- 2019** The products keep on coming! Shur-Co® adds the 4500 HD for grain cart applications, the AutoGate™ Gate Runner, TrapAdapt™ Manual Hopper Opener and Service Truck Power Kits.

## SUPERIOR MATERIALS AND WORKMANSHIP

Shur-Co® proudly serves our customers with 10 sales, service and distribution locations throughout North America, plus an ever-expanding global presence. We have the best-designed, best-engineered and best-built tarping systems on the market.

Our 150,000 square foot production site has its own dedicated tarp and metal fabrication facilities, giving us complete control over the products we produce. Exacting workmanship is key; our employees have a strong Midwest work ethic and are willing to go the extra mile to provide customers with a superior-quality product. They take pride in their jobs, and their dedication and attention to detail has earned us the respect of the tarping industry.

Shur-Co® never cuts corners. For our tarps, we use the finest solid vinyl-coated fabric with built-in UV inhibitors to reduce sun damage and fading. Each lot is lab tested for tear strength, abrasion resistance and cold-temperature flexibility.

Shur-Co® quality shows, even in the smallest details: Reinforced stitching adds strength at stress points, reducing the likelihood of tears. Seams are heat welded for a watertight bond between panels; the added thickness creates an improved moisture barrier. Roll tubes, fixed tubes and bows are made from Gatorshield™ galvanized steel tubing, with 50 percent more zinc than standard galvanized processes, ideal for high-moisture applications. All other steel components are plated to stand up to harsh road treatment chemicals. Aluminum, stainless steel and powder-coated parts are also available – and many come standard – when added protection is needed for corrosive environments.

# THE PRODUCT THAT CHANGED AN INDUSTRY

4

## THE FIRST ROLL TARP ON THE MARKET

**Before the Shur-Lok<sup>®</sup>, tarping farm trucks meant using fitted tarps held by ropes that ran through D-rings or bungees clipped to box hooks on the rub rail. Every time the tarp was put on or taken off, these had to be tied or untied, hooked or unhooked.**

Development of the Shur-Lok<sup>®</sup> began in the fall of 1978 at the Wahpeton Canvas Company in Wahpeton, ND. It was the brainchild of engineer Jerry Dimmer and his engineering team.

Bringing the Shur-Lok<sup>®</sup> to market was a multi-step process. First, a universal design for end caps that would work on any truck box was needed. Next, a roll tube was inserted into a pocket on the fixed side of the tarp to hold it to the box, with brackets that acted as tarp stops. A larger tube in a pocket on the other side rolled the tarp. A steel plate running the length of the box, dubbed the latchplate, gave the roll tube something to push against. This tightened the tarp as it rolled, with a universal joint to relieve tension at the point of contact.

Once completed, the Shur-Lok<sup>®</sup> made one-person operation simple. The tarp was opened by removing the crank from a retaining bracket and cranking the system toward the tarp stops. When the tarp rolled closed, the tube and tarp would snug up under the latchplate and lock into place when the crank was returned to the retaining bracket.

In 1992, the company (renamed Shur-Co<sup>®</sup> to better identify with its most famous product) relocated to Yankton, SD to be closer to its core market of grain trailer manufacturers.

# THE ORIGINAL SHUR-LOK® ROLL TARP

## OVER 40 YEARS LATER – STILL THE BEST!

Today's Shur-Lok® remains remarkably faithful to the original. In addition to farm bodies, it's been adapted for grain trailers, grain carts, tenders, spreaders and end dumps. A super-economical version for small wagons, the Shur-Lok® Junior, has caps built into the tarp.

Efficiencies have been factored in along the way; the gauge of steel has been increased on the crank extensions and to reinforce the U-joint. The steel parts, originally put through a dip tank and paint booth, are now plated for exceptional corrosion protection, and aluminum, stainless steel and powder-coated components are also available.

High-speed computer numeric control (CNC) technology has streamlined the manufacturing process. The first Shur-Lok® tarps were painstakingly tape measured and cut, with sew lines drawn on the material by hand. Now, tarps are precision cut to pattern for consistency, lower cost and shortened lead times.

These product improvements and process enhancements have allowed Shur-Co® to remain the industry leader, topped off by our dedication to complete customer satisfaction. Every Shur-Lok® tarp and kit is made to order – it's important to us that each customer gets the proper product for their application and that it fits exactly the way it should. Our slogan, "When you need to be sure, make it Shur-Co®," is an honest statement of fact, and we say it with complete confidence in our entire line of products. Shur-Co® has been field tested and farmer approved for over 60 years.

## SHUR-LOK® FOR GRAIN CARTS AND WAGONS

Shur-Lok® is a heavy-duty workhorse that will outperform your expectations. It offers dependable protection from the elements that stands the test of time. Standard features will do the job – and do it well, but if you like to customize, we have a huge range of options.

Our adaptable hardware lets you position the crank arm in the most efficient spot. The stand-offs come in 3-inch, 7-inch and 11-inch sizes while J-hooks are available in regular, pinless and offset-with-pin retainers. An upgrade to our pinless offset retainer will eliminate any pin-and-cable hassles and can be secured on either side of the cart. We also offer a universal crank retainer support kit to accommodate non-vertical configurations.

Ridge straps are made of stretch-resistant high-tensile webbing to keep the tarp from sagging between bows. We recommend dual straps for offset placement, a larger center opening and a clear flow for loading to reduce grain splatter.

For extra-wide carts with tip-top extensions, we suggest flat caps and trussed teardrop bows. The caps help shed water better while the teardrop bows facilitate tightening of the tarp. Trusses offer additional support for wide bows, where flat areas are susceptible to bending.

**Key Features:** Aluminum Latchplate, Recessed Tarp Stops, Galvanized Bows/Brackets, Galvanized End Caps, 1" Ridge Strap (Over 8'6" Gets 2), Stretch Cord Return, Long Crank Arm w/80" Extension, Pinless Crank Retainer w/7" Standoff, Universal Retainer Support Kit, 18-Oz. Vinyl Tarp.

## MADE TO FIT MOST MAKES AND MODELS

### SHUR-LOK® FOR FARM BODIES

From older trucks to the very latest models, a Shur-Lok® can protect whatever you haul. Our standard features fit most applications, but plenty of options are available – like a high-lift end gate kit, designed for use with high-lift end gates wider than the box.

The high-lift kit option is a bolt-on offset adjustable bracket that allows the latchplate and tarp stop to be spaced out flush with the width of the end gate. It's just one of many accommodating options offered. For example, aluminum end caps come standard – both low-rise and high-rise styles – but an upgrade to aluminum easy-off caps offers easier installation and removal. These quickly anchor with over-center clamps inside the truck box.

The standard crank arm mounts vertically across the back of the box and provides 4-position length adjustment. The U-joint has a 21-tooth splined key to adjust the tarp tension every 17 degrees. Upgrading to the Shur-Flex™ crank provides necessary flexibility for cargo doors or grain gates. It folds at the knuckle and secures to the side of the box with offset retainers.

Our standard stretch cord return guides the roll tube over the end cap, with a protective cover to reduce rope fraying. An upgrade to our patented Shur-Return™ features a heavy-duty steel tension spring, 1/4-inch non-stretch solid braid rope and lifetime warranty.

## SHUR-LOK® FOR TENDERS AND SPREADERS

Whatever you're hauling, from seed to blended fertilizer to micronutrients, it's critical that contents stay dry. Shur-Lok® is water resistant, durable and easy to open and close. Included stainless steel and powder-coated components provide lasting corrosion resistance.

Our stainless steel and powder-coated parts come standard, designed to protect against the corrosive effects inherent in hauling caustic substances like fertilizer. Stainless bows and brackets, end caps, ridge straps and crank retainers offer improved performance, longer life and a sharper appearance. Even the standard-issue easy-off tarp stop features a corrosion-resistant stainless steel stop body, plus powder coating for lasting durability.

**Key Features:** Aluminum Latchplate, Powder-Coated Easy-Off Tarp Stops w/Stainless Stop Bodies, Stainless Top-Mounted Bows/Brackets, Stainless End Caps, Stainless 1" Ridge Strap (Over 8'6" Gets 2), Stretch Cord Return, Standard Crank Arm w/80" Extension, Stainless Pinless Crank Retainer w/7" Standoff, 18-Oz. ## SHUR-LOK® FOR GRAIN TRAILERS

With proper tension, the tarp stays tight no matter your length of trailer. The standard crank is direct drive 1:1 and lets you roll the tarp while standing safely on the ground. A number of electric accessories are available from our SMARTrailer™ line, listed at left.

Our standard easy-off tarp stops enable fast, easy tarp removal. An upgrade from our standard stretch cord return to our cable return features a non-stretch cable with a heavy-duty internal tension spring-and-pulley system.

Our extendable spline crank assembly allows crank arm and U-joint to slide forward, bypassing hinges and clearing rear doors. This upgrade, ideal for open-top vans, Convertahoppers, belted floor trailers and “barn door” trailers, uses deeper caps that, if aluminum, are made of a heavier alloy. All require a cap depth of 26 inches.

Shur-Co® offers a wide variety of tarp fabric choices. Of special note is DiamondCore™, a premium fabric that provides added substance, increased endurance and unparalleled abrasion resistance. Unlike diamonds, no tarp lasts forever, but an upgrade to DiamondCore™ offers you rock-solid quality backed by a 24-month warranty. (In black only.)

**Key Features:** Aluminum Latchplate, Easy-Off Tarp Stops, Galvanized Bows/Brackets, Aluminum End Caps w/Radius Corner Front, 1" or 2" Ridge Strap, Stretch Cord Return, Standard Crank Arm w/80" Extension, Pinless Crank Retainer w/7" Standoff, 18-Oz. Vinyl Tarp.

## SHUR-LOK® DOUBLE TARP SYSTEM

**Safety is one huge advantage of utilizing Shur-Co's innovative double tarping system over a regular load hole tarp. You can keep both feet on the ground while opening the top tarp and exposing the load holes. No more having to climb up on top of the trailer!**

Shur-Co's double Shur-Lok® system uses our stretch cord return for uniform tension control on the bottom tarp and a cable return for the top tarp – for constant, extremely even rolling. Two separate crank arms with retainers lock tarps into place for secure over-the-road travel and can be positioned on the front or rear of the trailer.

Operate the top tarp for added protection, unrolling it over the bottom tarp for the most watertight environment. When rolled open, load holes are fully exposed, without use of a catwalk to reach them, eliminating any need for flaps with Velcro® and straps. When rolled closed, bottom tarp locks into place as it cranks up under the latchplate, the original and ingeniously engineered Shur-Lok® design. An electric tarp system can also be used to run the top tarp remotely.

The bottom tarp contains two reinforced load holes – helpful for dust containment, meeting dust-control regulations and providing product protection. If load holes are not needed, just roll open both tarps for complete trailer access.

**Key Features:** Aluminum Latchplates (2 Sets), Easy-Off Tarp Stops, Ridge Straps (2), Front Cable Return and Stretch Cord Return, Standard Crank Arms w/80" Extensions (2), Pinless Retainer w/7" Standoffs (2), 18-Oz. Vinyl Double Tarp – Bottom Tarp Contains Load Holes (2).

NOTE: Upgrade kits are also available (*chart on far right of page 15*).

## SHUR-LOK® FOR END DUMPS

**With Shur-Lok®, you get dependable water resistance and load protection, for increased productivity and less downtime – more loads mean more profit! A variety of options help you customize your trailer to meet your specific individual hauling needs.**

The Shur-Flex™ crank provides convenient flexibility. It folds at the knuckle and secures with offset or pinless offset retainers – no more pin-and-cable hassles.

The front fabric cap makes it easy to come over the top of the doghouse. Double bows secure in a double bow bracket – exactly the right spacing for tightening down the front of the tarp.

A front stretch roll return guides the roll tarp over the end cap, with a protective cover to reduce rope fraying. Reinforced stitching along the radius corner of the front fabric cap increases tear strength and helps the tarp withstand the stress of highway speeds. A rear flap, called a poorboy tail, is also available for extended coverage.

**Key Features:** Aluminum Latchplate, Easy-Off Tarp Stops, Fabric Front/Rear Caps, Shur-Flex™ Crank Arm, Front Roll Return, Offset Crank Retainers (4), 22-Oz. Vinyl Tarp.

*Galvanized and aluminum bow kits come standard with a 1" ridge strap; heavy-duty and Turning Point™ bow kits have a rollaway ridgepole. Durabow™ kits do not come with ridge support. Heavy-duty bow kits have the Shur-Return™; all others have a stretch cord return.*

### SHUR-LOK® FOR OPEN-TOP VANS

**Choose the proper roll tube for your particular hauling needs. The 3-inch aluminum roll tube shows less deflection than the 2-inch galvanized tube and also rolls faster, but it sacrifices torque in doing so – and is no more lightweight despite its extruded construction.**

Shur-Co's 3-inch roll tube is a good choice for loads that can make do with minimal or no bows. Upgrading to heavy-duty flat bows will reduce interference from loaders – an ideal accommodation for open-top vans that are maxed out on height allowance.

For standard 2-inch roll tube systems, upgrading to our extendable spline pull-out crank assembly allows the crank arm and U-joint to slide forward, bypassing hinges and clearing rear doors. This is ideal for open-top vans, Convertahoppers, belted floor trailers and "barn door" trailers. The design uses deeper caps that, if aluminum, are made of a heavier alloy. All require a cap depth of 26 inches.

**Key Features:** Aluminum Latchplate, 6" Offset Easy-Off Tarp Stops, Aluminum End Caps, Shur-Return™, 96" Shur-Flex™ Crank Arm, Offset Crank Retainers (4), 18-Oz. Vinyl Tarp.

### SHUR-LOK® JUNIOR FOR GRAIN WAGONS

The super-affordable Shur-Lok® Junior's tarp opens and closes exactly like *The Original Shur-Lok®*, but the caps are built right in. One-person operation is fast and easy – you crank the tarp up and over while remaining safely on the ground.

A specially designed econo-crank with square key allows for 4-position adjustment of the tarp tension. Easy-to-reach straps with bungee cords facilitate quick release and are readily accessible when securing the tarp for windy weather and transport.

Recessed tarp stops wrap the narrow top rails of grain wagons and keep the tarp from rolling off. The plastic protective cap protects the tarp from sharp corners.

**Key Features:** Galvanized Steel Latchplate, Fabric Caps Formulated into Tarp, Galvanized Steel Bows/Brackets, Recessed Tarp Stops, Crank Arm w/4-Position U-Joint, J-Hook Retainer w/7" Standoff, 1" Ridge Rope, 18-Oz. Vinyl Tarp.

*Recommended for boxes up to 9' wide and 15' long and vehicles not exceeding speeds of 35 mph.*

## BEST WAY TO HAUL HEAPED LOADS

### PREMIUM BELT 'N RATCHET SYSTEM (PBR)

If you're in the business of transporting light yet bulky materials like wood chips and trash, it's a good bet that you'll find the Premium Belt 'n Ratchet the perfect tarping system. It allows you to heap your loads above the bows and still keep the tarp tight for complete containment.

Belt 'n ratchet cranks are available in 84-inch and 114-inch lengths. Hold-downs secure the tarp tube for uniform tension. These can be ordered as strap tie-downs in 7-foot or 9-foot lengths or as ratchets with optional quick-release straps.

An improved crank key on the econo-joint offers easy crank installation and removal. You can also order a convenient leave-on option for the crank arm that allows it to remain attached to the trailer with a wire lock or pin.

**Key Features | Farm Body:** 5" Belt w/2" Ratchet Hold-Downs, Standard Tarp Stops, Galvanized Steel Bows/Brackets, Aluminum End Caps, 1" Ridge Strap, Rope Return, Square Key Crank Arm, Offset Crank Retainers (2), 18-Oz. Vinyl Tarp.

**Key Features | Grain Trailer:** 5" Belt w/2" Ratchet Hold-Downs, Standard Tarp Stops, Galvanized Steel Bows/Brackets, Aluminum Caps w/Radius Corner Front Cap, 1" Ridge Strap, Rope Return, Square Key Crank Arm, Offset Crank Retainers (2), 18-Oz. Vinyl Tarp.

**Key Features | End Dump:** 5" Belt w/2" Ratchet Hold-Downs, Easy-Off Tarp Stops, Fabric Front/Rear Caps, 1" Ridge Strap (Standard/Aluminum Kits), Rollaway Ridgepole (HD/TPB Kits), Rope Return, Square Key Crank Arm, Offset Crank Retainers (2), 22-Oz. Vinyl Tarp.

In the chart at right, features that come standard for end dumps are indicated, but you can also see what options are available for this application in each category.

## GUSTBUSTER™ TARP CORDS

**Exclusive design – like no other tarp cord in the industry! GustBusters attach permanently to trailers to hold down tarps. Keep yours from flipping in the wind – and perhaps taking you with it. Unique dual-grommet design accommodates both 96" and 102" trailer widths.**

Moisture-resistant polyester construction reduces the chance of dirt and grime getting embedded in the webbing to keep cords from turning brittle and abrasive. Durable stretch membrane is integrated throughout the webbing, so it won't bunch up on one side of the trailer. Flat profile of the cords holds contact with the tarp, for better wear and extended tarp life.

Grommets are centered in the cord, for a balanced look and most secure attachment. Aluminum construction of both the grommet and bushing helps prevent corrosion, upping the resistance factor, and matches the mounting screw for a sharper look.

**Key Features:** GustBuster™ Cords (2), Textured Poly Webbing, Dual-Grommet Ends, Aluminum Grommet/Bushing, Mounting Hardware, Easy-to-Follow Instructions.

Watch the GustBuster™ tarp cords in action!

## BOW COVERS

### Standard

Vinyl-coated compound protects bows against wear. Reduces grain splatter.

### Durabow™ Bow Sock

Designed to protect Durabows from pitting. Extends the life of bows and tarp.

## BOWS/BRACKETS

### Galvanized Steel

Bracket lets bow flex to allow for box expansion. Extended version also available.

### Adjustable

Adjusts bow length without cutting/welding loose shank. Secured with 5/16-inch bolt.

### Aluminum

Prevents a chemical reaction that occurs if steel is used on an aluminum trailer.

### Heavy Duty

Beefed-up bow permits bow spacing up to 12 feet apart. Used with rollaway ridgepole.

### Flat

Flattened version of a heavy-duty bow – no-rise design for less loader interference.

### Durabow™

Molded resin bow supports tarp but has enough give to be left on during loading.

### Stainless Steel

Our universal bow bracket in stainless steel. For durability in corrosive environments.

### Turning Point™

Angled bracket allows bow to move freely. Swings up and over loads without binding.

## CRANK ARMS

### Straight

Provides 4-position length adjustment. Mounts horizontally or vertically. In 3 sizes.

### Shur-Flex™

Pivots on a knuckle and folds for storage. Stores on side to accommodate rear doors.

### Square Key

Improved pilot crank key on econo-joint makes for easier crank installation or removal.

## CRANK ARM HARDWARE

### Standard Retainer

Traditional J-hook makes use of pins and cables to secure crank to trailer.

### Pinless Retainer

Secures crank arm to trailer without pins or cables. Safe and easy to use.

### Offset Pinless Retainer

Provides added security, eliminates pin-and-cable hassles. Use on either side of trailer.

### Standoffs

Choose from 2-inch, 3-inch, 7-inch and 11-inch sizes for optimal retainer placement.

### Universal Retainer Support

Accommodates a non-vertical configuration on carts or wagons. In 24, 33 and 42 inches.

## CRANK ASSEMBLIES

### Extendable Spline

Allows crank arm and U-joint to slide forward, bypassing hinges and clearing rear doors.

## END CAPS

### Galvanized Steel

Weld-free construction offers corrosion resistance. Front guard reduces wind whip.

### Aluminum

Sharper match for aluminum trailers. High-rise option provides more space for loads.

### Easy-Off Aluminum

Anchors with an over-center clamp inside box for easier access and faster removal.

### Fabric

Forms watertight seal where tarp and trailer meet. Flexes to prevent loading damage.

### Easy-Off Fabric

Facilitates fast, easy removal. Bolts on or secures with bungee cord tiedowns.

### Universal Aluminum

Flat 22-inch extension is cut and shaped at install. For trailers with hard-to-fit fronts.

### Stainless Steel

For increased corrosion resistance, more durable performance and sharper appearance.

### Fabric Flap/Poorboy Tail

Increased loading space and cargo protection. Poorboy tail is built right into tarp.

### Universal Flat

Flat, 22-inch extension helps minimize total height of trailer for hard-to-fit models.

### Combo Cap

Arched, fixed aluminum surface offers an improved seal, less wear on fabric portion.

## HIGH-LIFT END GATES

### Offset Adjustable Bracket

Allows spacing of latchplate and tarp stop out flush with width of end gate. Used primarily for high-lift end gates.

## HOLD-DOWNS

### Strap Tiedown

Fast and easy to use. Durable; withstands use and abuse. In 7-foot and 9-foot lengths.

### Ratchet Hold-Down

Available in D-ring and feed-through hook styles. Optional quick-release straps.

## LATCHPLATES

### Galvanized Steel

Runs entire length of box to offer resistance for roll tube to snug up against.

### Aluminum

Lighter-weight version of galvanized latchplate, for a more professional appearance.

## RETURNS

### PBR Rope

Solid braid run through hole in tarp helps to pull tarp over. Secures with box hooks.

### Stretch Cord

Helps guide front of roll tube across end cap. A protective cover reduces fraying.

### Cable Return

Uses a non-stretch cable and steel tension spring. Installs on front or rear of trailer.

### Shur-Return™

Non-stretch solid braid rope with heavy-duty steel tension spring. Works well in cold.

## RIDGE SUPPORTS

### Ridge Strap

Stretch-resistant webbing prevents tarp sag between bows. In 1-inch and 2-inch sizes.

### Stainless Ridge Strap

Same design as our standard ridge strap – in stainless steel for more corrosion resistance.

### Dual Ridge Straps

Offset placement offers bigger opening and clear flow for loading. Cuts grain splatter.

### Rollaway Ridgepole

Steel pole with protective end caps. Slides into pocket, then rolls up along with tarp.

## ROLL TUBE DEFLECTORS

### Molded Deflector

Reduces dings and scratches on carts and trailers. High-impact plastic, in black or gray.

## TARP OPTIONS

### Solid Vinyl-Coated Fabric

Heat-welded seams provide an added moisture barrier. Built-in UV inhibitors resist fading.

### Mesh Fabric

Durable lightweight fabric offers good air circulation in addition to secure containment.

### Active Decontamination Flap

Helps keep product off of top rails after loading, dumping it back into load.

### Load Hole Flap

Velcro® with buckle fastener facilitates all-weather loading, dust control. Not waterproof.

### Multicolored Fabric

Custom color creates high visibility for instant recognition. Acts as a deterrent to theft.

## TARP REPAIR

### Standard Kit

One pint of cleaner, 1 quart of vinyl cement and 10 square feet of vinyl-coated fabric.

### Professional Kit

Includes a Wagner heat gun, scissors, roller, 10 square feet of fabric and instructions.

## TARP STOPS

All interchangeable – use same hole spacing.

### Standard

Attaches fixed tube to side of trailer. Protective rubber top guards tarp from sharp edges.

### 3" Offset

Configured to store tarp off to side of top rail for additional loading space.

### Recessed

Wraps outside of narrow top rail on grain carts. Accommodates lip in-lip out top rails.

### Redesigned Easy-Off

Taller, with a patent-pending curved tip. Keeps tarp from getting hung up and rubbing.

### Flexible Easy-Off

Bends even in subzero cold. Impact and abrasion resistant with embedded safety plates.

### Redesigned 6" Offset EO

Offset design offers maximum loading space. Taller, with a patent-pending curved tip.

### 6" Offset Flexible Easy-Off

All the advantages of regular 6-inch offset easy-off stops, plus cold-temp flexibility.

### Easy-Off Belt Flex

Belted to flex in low clearance to end tarp stop damage. A 6-inch offset style also available.

### Powder-Coated/Stainless

Our basic easy-off stop – with a black powder-coated finish and stainless steel stop body.

## ORDERS

All orders are subject to written acceptance by Shur-Co®, LLC, PO Box 713, 2309 Shur-Lok Street, Yankton, South Dakota 57078-0713, USA. We are required by law to collect sales tax and F.E.T. taxes on products shipped to states where applicable. If tax exempt, a copy of your tax exempt certificate must accompany your order.

## EXPEDITE/CANCELLATION/CHANGE FEES

In-stock parts orders placed by 10:00 a.m. (Central Time) normally ship the same day. (This varies with quantity/size of the order.) Standard lead time on tarps and hardware kits is generally five (5) to seven (7) working days; however, if you request that your order of tarps, hardware kits and/or complete tarp systems be expedited earlier than the normal lead time, there will be an extra charge of \$25. This fee is in addition to shipping and handling charges. Any change will generate an additional charge of \$25, and a cancellation will generate a 15 percent restocking fee. Lastly, once an order is in production, no changes can be made – the order is then considered final.

NOTE: We have no control over delivery dates – only ship dates.

## SHIPPING

All orders are shipped F.O.B. from Shur-Co®, LLC, Yankton, SD; Stuart, FL; Fort Dodge, IA; Caldwell, ID; Decatur, IL; Lexington, MI; West Fargo, ND; Ravenna, OH; Brantford, Ontario, Canada; or Rochester, Kent, UK. No full freight will be allowed and no prepaid shipment accepted unless quoted and approved in writing prior to acceptance of order. All shipments are made by the most reasonable means in accordance with size and weight of order, unless specific routing instructions are furnished by customer. Shipments are made daily via U.P.S. and common carrier. Claims for shortages must be made within 10 days. Claims for damages or loss in transit must be made with the carrier. No collect calls will be accepted. To ensure delivery, we need your full street address and phone number. When you receive your shipment, examine it carefully. Be sure that all cartons listed on the delivery sheet are present and accounted for. Large items, like steel tubing, may be packaged separately. If a carton is damaged, open it and inspect contents before signing for delivery. If merchandise is damaged, describe the damage on the delivery receipt. Failure on your part to document damaged or missing merchandise on the delivery receipt releases carrier of liability; repair or replacement will be the customer's responsibility.

## CREDIT TERMS

Shipments are made on a cash basis – no C.O.D.s. We accept American Express, Discover, VISA, MasterCard and checks by phone or mail. Prices subject to change without notice.

## WARRANTY

We warrant that all new products are free from defects in materials and workmanship.\* Warranty is effective if products are properly installed and used for the purpose for which they were intended and applies to original buyer only. Except as set forth above or as set forth in any product-specific warranty documentation, we make no other warranties, express or implied, including, but not limited to, warranties of merchantability or fitness for a particular use.

## WARRANTY Continued

Returns for warranty must be accompanied by a Return Merchandise Authorization number (RMA#), obtained by calling Customer Service at 866-748-7435, and sent, with freight paid by us, to Shur-Co®, LLC, 2309 Shur-Lok Street, PO Box 713, Yankton, SD 57078-0713, USA. Products returned without an RMA# will be refused. When we issue the RMA#, we will also issue a call tag to have UPS (or other freight company) pick up the product. C.O.D. warranty returns will not be accepted. We will pay no storage charges for a warranty product return prior to pickup by us or the freight company. If a warranty product return is scheduled to be picked up by us, we will do so at our earliest convenience.

If the product returned is found, in our judgement, to be defective in material or workmanship, our obligation under this warranty is limited to repair or replacement of the product, which will be made by us. Repair or replacement will be at our discretion, with replacements being made using current products performing the equivalent function. Labor charges other than those incurred at our factory or customer-owned service location (see back cover for a listing of facilities), including, but not limited to, any labor to install a repaired or replacement product, are not covered under this warranty. All and any expenses associated with delivering defective products to our factory and delivering repaired or replacement products from our factory to the owner will be paid by us.

If the product returned is found, in our judgement, to be non-warrantable, the owner will be contacted to authorize repair, the purchase of a replacement product or return of the product, all of which will be at the owner's expense. Payment authorization must be received by us before any non-warrantable product is repaired, replaced or returned. All expenses associated with delivering the repaired non-warrantable product from our factory to the owner will be paid by the owner.

In no event will we be liable for damages of any kind to person, product or property, including, but not limited to, indirect, incidental, special, consequential or punitive damages, or damages for loss of profits or revenue, even if we have been advised of the possibility of such damages. There are no warranties for used products or products that have been repaired, altered, modified or subjected to misuse, negligence or accident. We will not repair or replace products that fail or malfunction due to ordinary wear and tear, except as expressly provided in a product-specific warranty. The use of non-Shur-Co®, LLC parts in conjunction with our products will void the product warranty.

\*Certain products have specific warranties that differ from this warranty, i.e. motors and electronics. Product-specific warranty documentation is available for these items. In the event of a conflict between this warranty and a product-specific warranty, the product-specific warranty will govern. SEE THE FULL LISTING OF SHUR-CO® PATENTS ON OUR WEBSITE: [shurco.com/patents](http://shurco.com/patents).

## RETURN POLICY

All sales are final. See WARRANTY section at left and above for information on warranty returns.

NOTE: No person is authorized to modify the foregoing conditions of sale whatsoever. All product listings, sizes, weights and manufacturing details in this catalog are subject to change without notice.
