The invention of Shur-Lok® revolutionized the tarping industry. The standard crank and makes one-person operation easy, letting you roll the tarp while standing on the ground. The arm mounts vertically across the back of the box and provides 4-position length adjustment. The U-joint has a 21-tooth splined key to adjust the tarp tension every 17°. An upgrade to our Shur-Flex™ crank clears cargo doors and grain gates, securing to the side of the box with offset retainers.

A wide range of adaptable hardware lets you position the crank arm in an efficient spot. An upgrade to our pinless offset retainer eliminates pin-and-cable hassles. Our specially designed universal crank retainer support kit accommodates non-vertical configurations.

Our standard stretch cord return guides the roll tube across the end cap. Upgrading to a cable return, which utilizes a non-stretch cable and steel tension spring and can be installed on both the front and rear of the trailer, offers even easier return assistance.

Easy-off aluminum tarp stops also come standard to facilitate fast, easy tarp removal. Ridge straps of stretch-resistant, high-tensile webbing keep the tarp from sagging in between bows. We recommend using dual straps for offset placement, a larger center opening and a clear flow for loading.

APPLICATIONS:

- Grain Carts and Wagons
- Farm Bodies
- Tenders and Spreaders
- Grain Trailers
- End Dumps
- Dump Bodies

With the Cable-Lok™, tension is distributed evenly along the fabric with no binding, overlap or friction. This gives the tarp a fitted appearance. Galvanized steel bows and easy-off tarp stops keep it simple, allowing fast tarp removal with minimal tools.

Cable-Lok™ is engineered for secure tarp attachment, with an extruded tarp slot running the length of the roll tube. A safety rod anchors the tarp into place.

Tarp stops are self cleaning for additional time savings. The crank retainer is designed to swivel for convenient snap-in attachment, and the polymer crank handle provides a sure grip, even in cold, wet weather.

The Cable-Lok™ spool roll tarp system features convenient no-weld installation and the most secure tarp attachment design ever developed.

APPLICATIONS:

- Grain Carts and Wagons
- Farm Bodies
- Tenders and Spreaders
- Belly Dumps

SMARTTrailer™ electric accessories help you do the job faster, easier, safer and with increased productivity. Thanks to our new ShurLink™ technology, all of the products shown can be operated from our ShurLink™ wireless remote system.

The 4500 HD features a powerful American-made motor, all-metal gear casing and incredibly reliable magnetic brake. Spiral spring returns, front and back, move the tarp smoothly over loads. Front/rear extruded aluminum torsion arms are the strongest on the market, backed by a lifetime guarantee. A patented dual-pivoting motor mount accommodates any roll tube misalignment without stressing the system.

PROTRAP® & AUTOTRAP™

Our ProTrap® and AutoTrap™ hopper door openers let you stay out of the dust. ProTrap's all-metal gears and housing are designed to the handle the hard stops. AutoTrap™ offers compact size, high clearance, and big performance all at an affordable price.

LiteALL™

The LiteALL's LED high-intensity flood beams, set into hinged mounting brackets, and swivel to put light exactly where you need it. A variety of configurations and components are available.

ELECTRIC GATE & HOIST™

Remotely control box hoist and rear slide gate on farm bodies. SMART mini-module and electric actuator power the slide gate while a second mini-module with electric-over-air solenoid valve controls the hoist.

SMART compatibility lets you use our remote to quickly and easily swing your auger hopper into position from the comfort of the cab. Rugged and dependable, with an aggressive tire tread. So simple to use! Controls are preassembled for easy installation and ready access during operation. Plus, you get a push-button LiteALL™ flood light.

AUTOGATE™

No need to get out of your vehicle to go through gates—our Farm Swing Gate does it for you! Use your ShurLink™ remote to open and close gates up to 18 feet wide with one quick press of a button. Has an automatic shut-off if gate is obstructed. Solar panel included.

ShurLink™ WIRELESS REMOTE

ShurLink EZR™ and ShurLink PRO™ lets you set exact positioning of tarps and traps. Runs 5–30 devices up to 150 feet. Both remotes has advanced industrial Bluetooth tech for greater reliability and range. Includes a phone app for customization and configuration.

The 4500 Series HD features a powerful American-made motor with an all-metal gearbox and incredibly reliable magnetic brake. Heavy-duty aluminum torsion arms are equipped with patented durable elbows for flexibility to move smoothly over loads.

Available for all trailer makes and models! The 4500 Series HD's motor produces optimal rather than increased torque (which can harm your tarp system). No electrical energy is used to actuate the brake, so there are no electrical connections to misfire. A patented pivoting motor mount allows for any misalignment of the roll tube without stress to the system.

The strongest arms in the industry are backed with a lifetime warranty. They arrive preassembled with a super-sturdy mounting bracket (no backer plate needed in most installs). The roller bearing style rear arm bracket has a low-friction design that won't wear out. Both arms are inset to prevent obstruction of clearance lights.

An improved rubber boot on the flex-joint guards against damage. An additional flex-joint, the Gate Flex™, bypasses side-and top-mount hinges to accommodate tailgates. A protective bolt-on shroud facilitates easy motor access.

Now available for grain carts!

KEY FEATURES:

- Spiral Spring Return
- HD Front/Rear Extruded Aluminum Torsion Arms w/Flex-Elbow and Boot
- Dual-Pivot Motor Mount: Pivoting motor mounting bracket offers freedom on two different axes to easily accommodate the occasional bent roll tube or uneven tarp roll. The custom protective bolt-on shroud provides additional motor protection from nature's elements.
- Sealed Control Box: The new trailer-mounted control box from Shur-Co® has fully sealed control switches for better internal component protection. The new design eliminates potential grime buildup between switches, which can cause the buttons to stick.
- SMARTwire™ Sealed Harness: Our SMARTwire's sealed connections make installation easy with no additional wire stripping or crimping of connections required. The SMARTwire™ harness has molded rubber connectors, automotive silicone seals, precision-machined brass pins and sockets and dual 6-gauge wire.
- ShurLink™ Wireless Remote: Express mode for precision control of Shur-Co® electrics! The ShurLink™ remotes offers 2-way communication in an easy-to-read digital display.
- Custom Motor Cover
- HD Mounting Bracket
