*These two are blanks that can be finished to your tarp length specifications.

You can get same-day shipping on orders from the list above right when placed by 12 Noon Central Time on our dedicated express line: 877.576.0959. Our sizes fit the most common trailer sizes on the road today. If what you need is not listed, we fabricate to length specifications and ship the next business day, depending on delivery method, destination and size of order.

Shur-Co® Express orders are processed at our Ft. Dodge, IA service center and cut and sewn at our Yankton, SD manufacturing facility. Tarps are built to Super Duty width (123" or 129") and are available for 96" or 102" wide trailers. This is a speedy and economical way to order your replacement tarps, and Shur-Co® builds the very best tarps on the market.

As always, Shur-Co quality is in the details. We use the finest solid vinyl-coated fabric built-in UV inhibitors to reduce sun damage and fading. Each lot is lab tested for tear strength, abrasion resistance and cold-temperature flexibility. Reinforced stitching adds strength at stress points, reducing the likelihood of tears. Seams are heat welded for a watertight bond between panels; the added thickness creates an improved moisture barrier. While not available in the Express tarp line, you can order our regular tarps in a wide range of colors and fabrics, with options like multiple colors, additional bow and tarp reinforcements and more.

Genuine Shur-Co® Replacement Parts
A Must for Warranty Requirements

For quality performance, go with the name you can trust. Remember that utilizing non-Genuine Shur-Co® parts can void your warranty agreement.

Our Authorized Dealers and Service Center Managers have assembled a list of parts most in demand by our customers. Order these items singly or as a complete package (P/N 1113373). Be sure you're getting Genuine Shur-Co® parts; log on to www.shurco.com/locations for our list of dealers.

The Shur-Co® Promise
The Best-Designed, Best-Engineered & Best-Built Tarp Systems

We are committed to meeting your tarping needs, thanks to our dedicated staff and strong midwestern work ethic. Our 150,000 square foot tarp and metal fabrication facility – in combination with 11 service sites throughout North America, hundreds of Authorized Shur-Co® Dealers and an expanding global presence – make Shur-Co® the name you can trust.

Our employees go the extra mile to provide our customers with superior-quality products. They take pride in their jobs, and their workmanship and attention to detail has earned us the respect of the tarping industry during our 60-plus years of business.

Shur-Co's innovative team of engineers and thorough research-and-development staff are constantly striving to make our products the very best they can be. Stringent quality assurance testing is ongoing, and customer input is given the utmost consideration. Our goal is always to make our products the hands-down best choice in the industry.

The Original Shur-Lok®

Shur-Co's Heavy-Duty Workhorse

The invention of the Shur-Lok® revolutionized the tarping industry. Our standard crank is direct drive 1:1 and makes one-person operation easy, letting you roll the tarp while standing safely on the ground. The arm mounts vertically across the back of the box and provides 4-position length adjustment. The U-joint has a 21-tooth splined key to adjust the tarp tension every 17 degrees. An upgrade to our Shur-Flex™ crank clears cargo doors and grain gates, folding at the knuckle and securing to the side of the box with offset retainers.

A wide range of adaptable hardware lets you position the crank arm in the most efficient spot. An upgrade to our pinless offset retainer eliminates pin-and-cable hassles and can be secured on either side. Our specially designed universal crank retainer support kit accommodates non-vertical configurations.

Our standard stretch cord return guides the roll tube across the end cap. Upgrading to a cable return, which utilizes a non-stretch cable and steel tension spring and can be installed on both the front and rear of the trailer, offers even easier return assistance.

Easy-off aluminum tarp stops also come standard, to facilitate fast, easy tarp removal. Ridge straps of stretch-resistant high-tensile webbing keep the tarp from sagging in between the bows. We recommend using dual straps for offset placement, a larger center opening and a clear flow for loading.

Available Applications

Grain Carts and Wagons
Farm Bodies
Grain Trailers
End Dumps
Tenders and Spreaders
Dump Bodies

The Original Shur-Lok® offers dependable protection from the elements and superior construction to stand the test of time. What comes standard will do the job – and do it well, but if you like to customize, we have a variety of options.

For small boxes up to 9 feet wide and 15 feet long, our Shur-Lok® Junior has the caps built right into the tarp!

PBR

Premium Belt 'n Ratchet

Lets you load above the bows – the practical choice if you're in the business of transporting light yet bulky wood chips or trash.

Belt 'n ratchet cranks are available in both 84-inch and 114-inch lengths for optimal positioning. An improved crank key on the econo-crank facilitates easy crank installation and removal. The leave-on option for the crank arm keeps it attached to the trailer with a wire lock or pin.

GUSTBUSTER™ Tarp Cords

Our tarp cords attach permanently to trailer to hold down tarps. Bolt 'em on and you're done! Dual-grommet design accommodates both 96-inch and 102-inch trailer widths.

The SMARTrailer™ Line of Electric Accessories

SMART2™ & SMART3™ Remotes, 4500 Series HD Tarp, ProTrap® & AutoTrap™

With Sealed Control Boxes & Quick-Connect SMARTwire™ Harness

& AutoTrap™ Hopper Openers, Gate & Hoist, DriveMaxx™ Auger Drive, Swing Gate, LiteALL™

Shur-Co's SMARTrailer™ electric accessories help you do the job faster, easier, safer and with increased productivity. Thanks to our SMART-touch technology, all of the products shown here can be operated from our SMART2™ or SMART3™ remotes. (See more on these, below right.)

The 4500 HD features a powerful American-made motor, all-metal gear casing and incredibly reliable magnetic brake. Spiral spring returns, front and back, move the tarp smoothly over loads. Front/rear extruded aluminum torsion arms are the strongest on the market, backed by a lifetime guarantee. A patented dual-pivoting motor mount accommodates any roll tube misalignment without stressing the system.

Our ProTrap® and AutoTrap™ hopper door openers let you stay back, out of the dust. ProTrap's all-metal gears and housing are designed to handle the hard stops while AutoTrap™ offers compact size, high clearance and big performance – all at an affordable price.

SMART2™ & SMART3™ Remotes

SMART2™ lets you set exact positioning of tarp and traps. Runs over 100 devices from more than 100 feet away. SMART3™ has 5-channel operation, great range and Bluetooth compatibility. Switch between applications with the Select button – active channel will light up. Configures to Momentary Mode (press-and-hold) or Express Mode (press-and-release).

4500 Series HD

ProTrap® & AutoTrap™

LiteALL™

The LiteALL's LED high-intensity flood beams, set into hinged mounting brackets, swivel to put light exactly where you need it. A variety of configurations and components are available.

Electric Gate & Hoist System

Remotely control box hoist and rear slide gate on farm bodies. SMART mini-module and electric actuator power the slide gate while a second mini-module with electric-over-air solenoid valve controls the hoist.

DriveMaxx™ Auger Drive

SMART compatibility lets you use our remote to quickly and easily swing your auger hopper into position from the comfort of the cab. Rugged and dependable, with an aggressive tire tread. So simple to use! All controls are mounted together for ready access, plus you get a push-button LiteALL™ flood light. (Upgrade to Shur-Co's SMART2™ or SMART3™ LiteALL™ for remote control of the lights.)

Electric Farm Swing Gate

No need to get out of your tractor or truck to go through gates – our Farm Swing Gate does it for you! Use your SMART remote to open and close gates up to 18 feet wide with one quick press of a button. Has automatic shut-off if gate is obstructed. Solar panel included.

Available Applications

Grain Carts and Wagons
Farm Bodies
Tenders and Spreaders
Belly Dumps

The Cable-Lok™ spool roll tarp system features convenient no-weld installation and the most secure tarp attachment design ever developed.

Cable-Lok™ Spool Roll Tarp

The Go-To Choice for Busy Farmers

With the Cable-Lok™, tension is distributed evenly along the fabric – no binding, overlap or friction. This gives the tarp a fitted appearance that looks great. Galvanized steel bows and easy-off tarp stops keep things simple, allowing fast tarp removal with minimal tools.

Cable-Lok™ is engineered for secure tarp attachment, with an extruded tarp slot running the length of the roll tube. A safety rod anchors the tarp into place.

Tarp stops are self cleaning for additional time savings. The crank retainer is designed to swivel for convenient snap-in attachment, and the polymer crank handle provides a sure grip, even in cold, wet weather.
