

TATER-TOP™ TARP SYSTEM

AGRICULTURE DIVISION

“LOADED” WITH FEATURES, BUT NO HYDRAULICS

A032FL-1018

“Loaded” with features, but no hydraulics to weigh it down. Lower cost and easier installation, too. Rolls and climbs to clear heaped potato loads – no bows needed. Improved rear pivot arm swings all the way around the back, a full 270 degrees, so nothing will obstruct the rear doors.

Exclusive Tater-Top™ potato trailer tarping system provides super-secure closure. Tarp snugs up under the latchplate (a design originally patented on *The Original Shur-Lok®* roll tarp) and a bungee in the tarp closes it tightly, with no overhang. A mini “Poor Boy” tail replaces the face panel. The powerful worm gear motor makes for improved clearance. The standard rear arm swings out and can be locked in the open position – allows operators to back into tighter confinements. (Fixed rear arm also available.) Our SMART electronics operate the tarp system in Express Mode, with programmable end stops. 30-foot box limit.

Key Features: SMART Capabilities, Worm Gear Motor, Heavy-Duty Steel Arms, Universal Mounting Bracket, Hinged Swing Pivot Arm, Locking Rear Brace, Mini “Poor Boy” Tail, Aluminum Latchplate, SMART3™ Remote.
