FOR IMMEDIATE RELEASE: July 22, 2022

The New Standard in Tarping

Shur-Co® Releases New Product to the Market

Yankton, SD: Shur-Co®, LLC is pleased to announce the launch of its new APEX™ Chip and Refuse Trailer Tarping System.

The APEX™ Chip and Refuse Trailer Tarping System is the newest addition to Shur-Co's diverse line of industry leading covering systems for heavy trucks and trailers. The unique APEX™ design addresses common challenges faced by operators of wood chip and refuse trailers including excessively tall material loads, cramped spacing between the tractor and the trailer, and top-hinged rear doors with forward-positioned hinge mounts.

Features and benefits of the APEX™ tarping system include:

- **Easily covers chip and refuse loads as tall as 24" above the trailer top rail.**
- **Fits trailers with reduced spacing between the tractor (cab) and the trailer.**
- **Unique two-knuckle rear arm (patent pending) allows APEX™ to operate effectively on trailers where rear door top hinges are located as much as 10" forward from the rear of the trailer.**
- **Retrofit-able to trailers where manual tarp systems or other automatic systems are already installed.**
- **Superior motor & circuit protection.**

Commenting on the APEX™ product release, Scot Fuhrman, Vice President of Sales states, "At Shur-Co we place the highest priority on designing and developing impactful, new products that address unmet needs and deliver substantial value to our customers. We have an incredible team of talented engineers at Shur-Co, and we do all we can to provide them the tools and support they need to deliver the best products our customers need. We have done extensive field-testing of the new APEX™ covering system and are extremely excited to announce its launch. We believe our team has really hit a home run here. We expect this system to enhance operator safety and efficiency and aid fleets with greater vehicle uptime and driver retention."
