## SUPER-DUTY 18-OZ & 22-OZ VINYL

This one-step-up tarp is available in two weights - 18-oz. and 22-oz. Wider than the Value Series tarp, it is built in the same fashion you see on most new grain trailers. The longer tensioning straps provide for improved tightening while the extra width makes tarping heaped loads easier. If you haul aggregates or something other than small grains, use of a Super-Duty 22-oz. tarp is recommended.

### WEIGHT

18-OZ       22-OZ

### COLORS

BLACK       RED       ROYAL BLUE       WHITE

GREEN       ORANGE       MAROON       TAN

GRAY

### 18-OZ EXCLUSIVE COLORS

GRAPE       YELLOW

## VALUE-SERIES 18-OZ VINYL

Economical choice. Less suitable for over heaped loads. Not available for box widths greater than 102".

### COLORS

BLACK       ROYAL BLUE       WHITE

## DIAMONDCORE™

This premium fabric - a Shur-Co® exclusive, features unparalleled abrasion resistance and extra reinforcement straps. Unlike diamonds, no tarp lasts forever, but DiamondCore™ has rock-solid quality backed by a 24-month warranty - the best in the industry. (ONLY available in black and ONLY for grain trailers.)

## CRXT (CHEMICALLY RESISTANT EXTREME) FABRIC

Should be used for feed byproducts and distiller's grain. If other tarps are used for this purpose, they will not be eligible for a warranty.

This fabric is highly resistant to solvent chemicals or products that have been changed by the extraction of oils to make feed-based products. Shur-Co® recommends CRXT fabric for any trailer, including live bottom floor, hopper bottom, end dump, belly dump, etc., that hauls distiller's grain in either a wet or dry application or other materials that might be chemically altered, especially where oils or other ingredients have been extracted from the original product makeup.

## MESH TARP

Standard choice for chip trailers. Can also be used for refuse trailers.

### COLORS

BLACK       RED

## ADD-ON FEATURES

LOAD HOLE FLAP(S)      QTY \_\_\_\_\_

DOUBLE TARP SYSTEM

Safety is a huge advantage of Shur-Co's double tarp system over a regular load hole tarp. With a double tarp system, you keep both feet on the ground while opening the top tarp and exposing the load holes underneath. This system is also designed to provide the most watertight environment - it eliminates the need for Velcro® flaps and straps since the top tarp completely covers the load holes.

TARP REINFORCEMENTS

BOW REINFORCEMENTS (10")

ACTIVE DECONTAMINATION FLAP

MESH INSERT 72"x26" (OR SMALLER). LARGER NEEDS A SPECIAL QUOTE.

Please use the diagram below and any measurements needed to properly place features on the tarp.
