CONFIGURING YOUR SYSTEMS

Shur-Co® systems can be ordered using two different methods, by a part number, which allows the customer to order standard features only. The other, is by configuring the options desired. For that type of kit order you will find your price for the standard features listed, then select your desired options.

In this example the alphabetical letter **B** designates the feature, the bullet • designates the standard feature in the kit, the numerical value **2** shows a different available option for that feature. This will allow the customer to communicate their desired feature, by requesting feature B2 [Easy-Off Tarp Stops]. The price can then be found by taking "Deduct/Ea." $ Amount and multiplying that by the number of tarp stops found in the **HARDWARE QTY** chart for your size kit, then deducting that $ amount from the standard price.

ALUMINUM ARM SYSTEM

KEY FEATURES

- Extruded Aluminum Roller Bar with Side Plates
- Aluminum High-Gloss Pivot Arms
- Durabuilt™ Motor with 3-Year Warranty
- Rotary Switch
- Assembled Housings - Standard for 38' and 41' Kits
- High-Mount Compatible - Up to 23' Only

The spring assembly features five per side to ensure loads are secure. An exclusive extra-strong stamped-steel spring enclosure, dubbed “the clamshell” for its impressive closing capabilities, protects the springs from rocks, mud and debris. A two-part stamping process eliminates welds and contributes to a more indestructible product. The heavy-duty grade 8-spring pin will not break. Models marked “UB” are designed with 22-coil under-body spring assemblies.

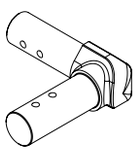

Pivot arms are thick-walled and guaranteed unbreakable. Optional 30° arms are bent with a specially-made die in a one-piece design, optimum for structural integrity. Die-cast 90° aluminum elbows at rear cross piece match arm shape and enhance arm strength. An upper bolt slot simplifies arm installation.

UT TARP SYSTEM™

KEY FEATURES

- "Tarp-Locking" Crank Handle
- Molded HDPE End Caps
- 3-PC Adjustable Width Aluminum Roller Bar
- Heavy-Duty Bearings
- Adjustable Width from 86" – 104"
- Tension Ratchet

SIMPLE AND SECURE OPERATION

The UT Tarp System™ ships with a pre-assembled crank handle. The overall width of the system can be set from 86" – 104" right out of the box. For applications narrower than 86" it is simple to cut the roll tube(s) accordingly. The kit bolts or welds directly to the bearing plates incorporated into most trailers and truck bodies. For bodies without a built in tarp system, kit P/N 1809905 includes mounting plates and fasteners that you will need to mount your new UT Tarp System™. Kits contain hardware only. Tarps sold separately.

The UT Tarp System™ and can be paired with any of our stock tarp materials, including PVC mesh, Asphalt Lumite, Donoprene or 18-oz. vinyl. Replacement tarps are in stock and readily available. To cover, pull tarp to the back of the body and tie off the pull rope to brackets (provided). Locking-sprocket crank secures tarp. To uncover, untie the pull rope using the crank handle. 1-PC and 3-PC pull bar assemblies are available.

DURAPULL™

GALVANIZED STEEL TARP HOUSING

The 12-gauge heavy-duty galvanized steel housing protects the tarp and spring-loaded spool from falling materials. The housing has an angled top to ensure self-cleaning, so any material dropped on it will fall back into the truck/trailer box.

SPRING-LOADED TARP SPOOL

The tarp spool is made of aluminum and has an extruded groove that allows for easy installation or removal of the tarp. An internally mounted torsion spring lets the tarp spool automatically retract and wind the tarp.

TENSION RATCHET

This allows the tarp spool to be easily pre-loaded for operation, and it is also easily adjusted to increase or decrease spring tension.

TARP REMOVAL/REPLACEMENT

The mesh or solid vinyl tarp can be easily removed, reinstalled or replaced without removing the tarp spool or the spring tension.

TARP GUIDES

Tarp guides help keep the tarp centered on top of the box by hanging over the side and keeping the pull bar from moving from side-to-side.

MOUNTING SYSTEM

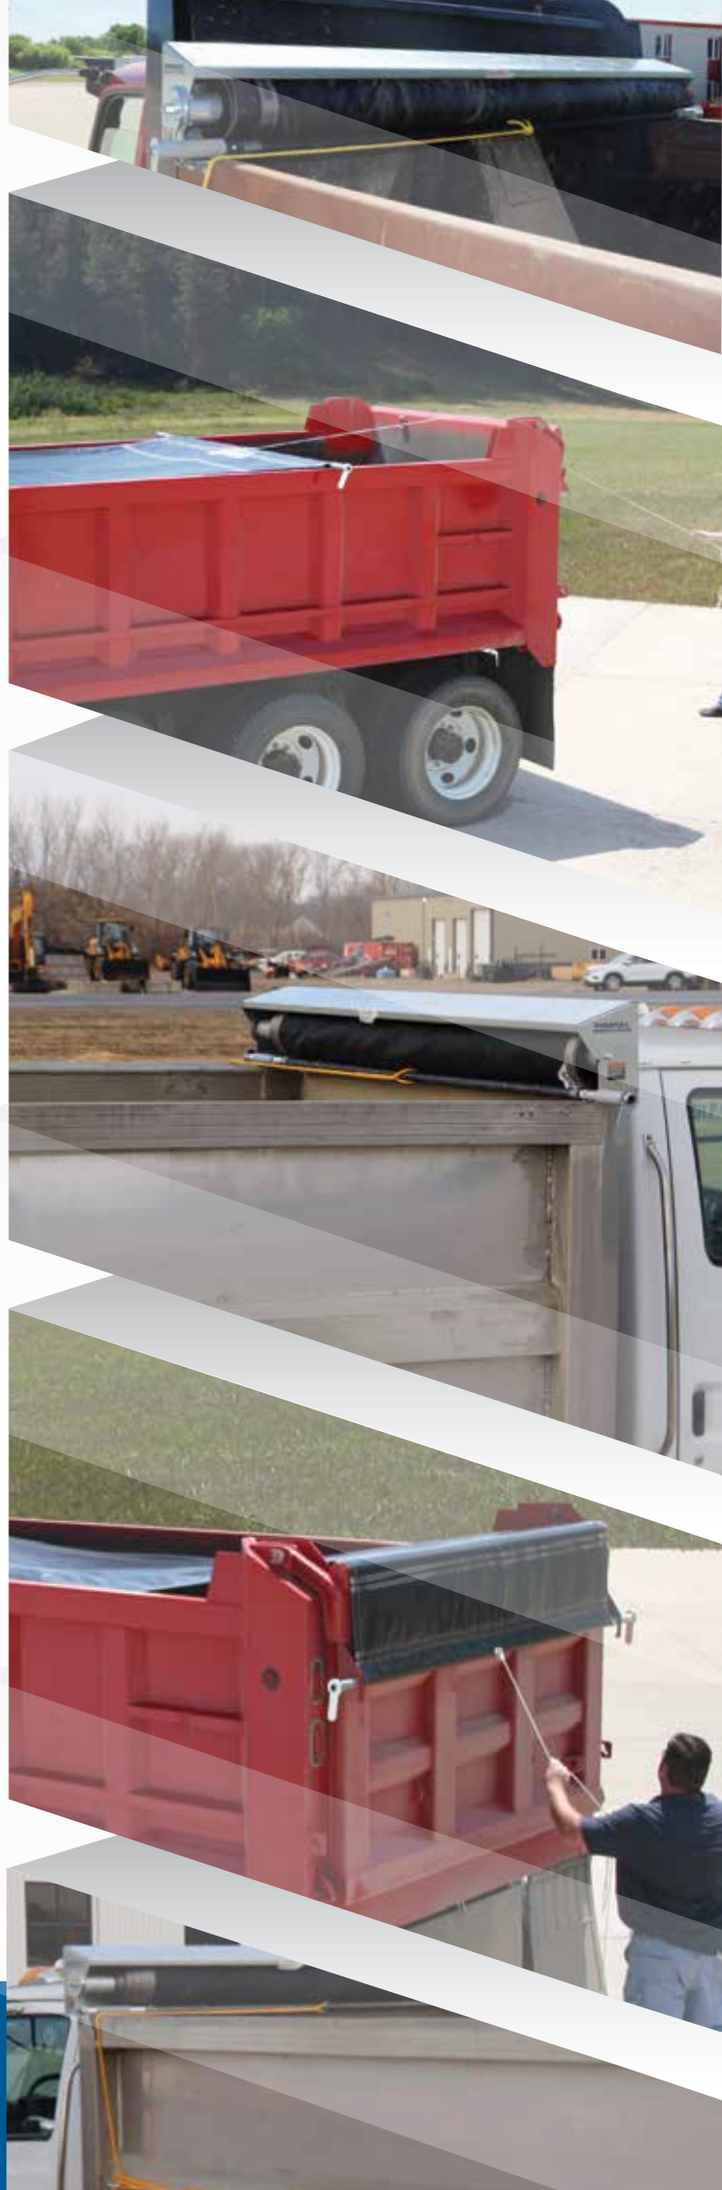

The tarp housing mounting system allows the tarp housing to be easily removed, if necessary, for seasonal changes in hauling.

TARP SPOOL REMOVAL/MAINTENANCE

If the tarp spool ever needs to be removed, it can be removed fully assembled without having to disassemble or remove the tarp housing.

KEY FEATURES

- 12-Gauge Galvanized Steel Housing
- Spring-Loaded Tarp Spool
- Steel Mounting Strip - Standard with Steel Kits
- Aluminum Mounting Strip - Standard with Aluminum Kits

2000SR

KEY FEATURES

- Tarp Spool with Side Plates
- Adjustable Width Steel Housing
  - Standard for 1800047
- Aluminum Pull Bar
- Armless Spring Return
- Adjustable - Width Roller Bar
- External Spring Tension Adjustment
- Roller Spring is Backed by a Lifetime Warranty

FITS YOUR TRUCK RIGHT OFF THE SHELF

The 2000SR uses a spring return roller bar to retract the tarp automatically. This system can be ordered with or without the expandable tarp housing. The telescoping aluminum roller has no required assembly; simply extend it to the proper width before installing. Sealed bearing construction includes a 3/4" center support shaft for durable heavy-duty operation. An external tensioner allows adjustments without removing the tarp.

SHUR-TRAK™ II

COMPARING SHUR-TRAK™ II AND SHUR-TRAK™ II SHORTSTOP™

Fully deployed, the standard tarp-over-rail design gives coverage several inches over the side rail to shed water better. If water resistance is not a factor, our Short-Stop™ tarp option will eliminate friction, helping to extend the life of your tarp. The tarp stops short of the inside rail.

LOW FRICTION AND HIGH STRENGTH

Our exclusive Twist-Lok™ bow shanks, constructed of low-friction/high-strength polymer, twists off without removing the cable. The shanks are available in standard and Short-Stop™ styles that let you replace damaged bows faster.

MOTOR OPTIONS AVAILABLE

Choose between our Durabuilt™ motor for systems under 25' and our heavy-duty chain drive motor for systems over 24'. An electric system is now available with the ShurLink™ wireless remote control.

REDUCES BINDING

Wheel wind guards with an inline design can be added as needed to reduce binding. Another option is a continuous wind guard with an offset arm which positions the wind hooks under the anchor as the system opens and closes. It's a wider design, running the full length of the trailer. Close proximity to the bottom of the bow shanks limits wind up underneath the sides of the tarp. This is ideal for replacement tarps eliminating the problem of existing anchors lining up.

TENSION ADJUSTMENTS MADE EASY

The improved cable tension scale is equipped with a thrust washer to make adjustments easy. A sight gauge shows if more tension is needed, a correction you can make with a few twists of your wrist.

REDUCES TARP STRESS AND SAGGING

A rear bow stabilizer prevents the rear bow from rocking. This reduces stress on the tarp, cable and bow shanks while lessening tarp wear at the point of attachment. In addition, it helps keep the tarp from sagging and wearing between the last two bows.

REMOTE OPTIONS AVAILABLE

A cab-installed rocker switch allows you to open/close the system from your truck cab. Our optional 30-channel ShurLink PRO™ or 5-channel ShurLink EZR™ wireless remote controls are available. Control multiple Shur-Co® wireless products with a single remote at ranges of 150'.

KEY FEATURES

- Twist-Lok™ Bow Shanks
- Rolling Wheel Wind Guards with Standard or Continuous Wind Anchors
- Cable Tension Scale or Adjustable Rear Pulley
- Rear Bow Stabilizer

SHUR-TRAK™ II FEATURES

Start with your pulley-to-pulley measurement, which is critical to determine the correct length of your system. The over-the-rail tarp that comes standard on the complete kits helps shed water better. If water resistance is not a factor, our Shur-Trak™ II ShortStop™ kits have a tarp that stops short of the trailer to eliminate friction. A continuous wind anchor is also available if desired. Our universal landing's bolt-together design squares the radius corners and can mount out to 18" (square corners only) for more loading space on belly dumps.

REAR PULLEYS

ADJUSTABLE

- For Fast Adjustment to Drive Cables
- Standard Maintenance with Minimal Tools

EXTENDED BRACKET

- Allows Tarp to Extend Fully to Rear if Mounting Surface is too Far Forward for Standard

WIND-GUARDS

CONTINUOUS DESIGN

- Wider Design with Offset Arm Places Wind-Hooks Under Anchor for the Full Length of the Trailer

WHEEL DESIGN

- Inline Design can be Added as Needed to Reduce Binding and Decrease Wind up Under the Tarp

SHUR-LOK®

SHUR-FLEX™ CRANK ARMS

- Pivots on a Knuckle and Folds for Storage
- Stores on the Side to Accommodate Rear Doors

DURABOW™

- Molded Resin Bow Supports Tarp

TURNING POINT™ BOW SYSTEM

- Angled Bracket Allows Bow to Move Freely
- Swings Up and Over Loads without Binding

FLEXIBLE EASY-OFF TARP STOP

- Bends Even in Subzero Cold
- Impact and Abrasion Resistant with Embedded Safety Plates

SHUR-RETURN™

- Non-Stretch Solid Braid Rope with Heavy-Duty Steel Tension Spring
- Works Well in Cold Weather

Shur-Lok® provides you with watertight dependability for increased productivity and less downtime. The Shur-Flex™ crank offers convenient flexibility. It folds at the knuckle and secures with offset or pinless offset retainers. No more pin-and-cable hassles.

The front fabric cap makes it easier to come over the top of the doghouse. Double bows secure into a double bow bracket – exactly the right spacing for tightening down the front of the tarp. The front stretch roll return guides the roll tarp over the end cap. Reinforced stitching along the radius corner of the fabric cap helps the tarp withstand the stresses of highway speed.

**Electric Shur-Lok® options are available for belly dumps and dump bodies. Call for special pricing.*

TURNING POINT™ BOW

DURABLE SWIVEL

Each bow is connected to the ridgepole at the center of the bow with a 1" solid steel pivot pin creating durable swivel points for the bows to operate.

HIGH-CLEARANCE BOWS

The design of the Turning Point™ Bow uses angled pivot brackets which allow the bows to swing not only over but upward. This allows you to clear heaped loads as they open and close more easily.

EASY RELEASE AND CAPTURE

Spring-loaded locking pins make locking and unlocking the bows as easy as pulling a rope. Pull the rope to release the pin, allowing you to pull the bows to the side in the open position. When done loading, simply pull the bows across the load and let the locking pins capture the bows and lock them into position.

GATORSHIELD® TOUGH

Bows and ridgepoles have been constructed from strong Gatorshield® galvanized steel tubing, creating a corrosive-resistant tarp system.

ELECTRIC TURNING POINT™ BOW

KEY FEATURES

- Electric Cut-Off Switch
- Automatic Overload Slip Clutch
- Locking Skid Plate
- Bow Actuator
- Easy Electric-to-Manual Conversion
- ShurLink PRO™ and ShurLink EZR™ Remote Systems Capabilities, Available Upon Request, See Accessories Section for Details

Bows move as one, swinging up and out of the way for wide-open loading. The operator can remain safely in the cab while operating the system with a rocker switch or our ShurLink PRO™ and ShurLink EZR™ remotes. (No positional feedback with ShurLink PRO™.)

The center pivoting ridgepole holds the tarp without sagging, so you need fewer bows. The locking system provides secure support during transport and serves as a skid plate when the bows swing closed.

The electronic actuator is designed for long life in the harshest conditions, operating in temperatures ranging from -86–140° F. Integrated brakes lock out movement, a slip clutch automatically protects the actuator from overload and a cut-off switch prevents operation unless the roll tarp is completely open.

4500 SERIES HD

KEY FEATURES

- Spiral Spring
- HD Front/Rear Aluminum Torsion Arms with Flex-Elbow and Boot
- HD Mounting Bracket
- Dual-Pivot Motor Mount
- Custom Motor Shroud
- Sealed Control Box
- SMARTwire™ Sealed Harness
- ShurLink PRO™ and ShurLink EZR™ Remote System Capabilities, See Accessories Section in Catalog for Details

The 4500 Series HD features a powerful USA-made motor with all-metal gearbox and an incredibly reliable magnetic brake. Heavy-duty torsion arms are equipped with patented durable elbows for flexibility to move smoothly over loads.

The 4500 Series HD's motor produces optimal rather than increased torque (which can do harm to your tarp system). No electrical energy is used to actuate the brake, so there are no electrical connections to misfire. A patented pivoting motor mount allows for any misalignment of the roll tube without stress to the system.

The heavy-duty arms are backed with a lifetime warranty. They come preassembled with a super-sturdy mounting bracket. No bracket plate needed in most installs. The roller bearing style rear arm bracket has a low-friction design that won't wear out. Both arms are inset to prevent obstruction of clearance lights.

APEX™

TIGHT SPACING

In situations where operators have limited spacing between the back of the cab and the front of the trailer, tight turns can damage automatic tarp system components. The APEX™ system's low-profile electric motor allows use of the system on trailers when other covering systems may not be a viable option.

CHALLENGING REAR DOOR HINGES

Unique two-knuckle rear arm (patent pending) allows APEX™ to operate effectively on trailers where rear door top hinges are located as much as 10" forward from the rear of the trailer. Forward-mounted rear hinges render most other tarp systems' rear arms unusable.

SUPERIOR MOTOR AND CIRCUIT PROTECTION

APEX™ offers "Express Mode" functionality when used with capable models of Shur-Co's ShurLink™ remote controls, which provides automatic, one-push covering and uncovering without current spikes.

RETROFIT-ABLE

APEX™ is compatible with most brands of roll tarp systems with flat caps. Owners of manual side to side tarp systems interested in converting to electric OR those unsatisfied with their current electric tarp systems can upgrade by retrofitting their trailer with the APEX™.

KEY FEATURES

- Easily Covers Chip/Refuse Loads 24" Above the Trailer Top Rail
- Fits Trailers with Reduced Spacing Between the Tractor and the Trailer
- Superior Motor & Circuit Protection
- Retrofit-Able to Trailers Pre-Installed Tarp Systems

BELT 'N RATCHET

HOLD-DOWNS

The 2" hold-downs secure the tarp tube for uniform tension across the tarp and make tension adjustments quick and easy. These can be ordered as strap tie-downs or as ratchets with optional quick-release straps.

3" OFFSET EASY-OFF TARP STOP

Designed for maximum loading space. The self-cleaning design prevents buildup around the fixed tube. Permits fast, easy tarp removal with minimum tools.

6" OFFSET FLEXIBLE EASY-OFF TARP STOP

Bends even in subzero cold. Impact and abrasion resistant with embedded safety plates for added durability. Designed for maximum loading space.

VINYL TARP

Made of a solid vinyl-coated fabric for a more durable and longer tarp life. All seams are heat-welded to provide an added moisture barrier. Built in UV inhibitor resist fading. Available in 18-oz. and 22-oz. material.

MESH TARP

Made of a durable lightweight fabric this option offers good air circulation in addition to secure containment. Seams are heat-welded for added durability.

KEY FEATURES

- Aluminum Front and Rear End Caps
- 2" Ratchet Hold Down
- Easy-Off Tarp Stops
- Rope Return
- Square Key Crank Arm

CONTROL MODULES

CONNECT TO YOUR SUPPLY VOLTAGE

These modules connect to supply voltage for smooth, seamless operation of your SMARTrailer™ accessories. When output is on, white output wire is connected to 12V; when off, it's grounded.

SAFETY LOCKOUT FEATURE

All modules except LiteALL™ have a safety lockout feature. While locked, outputs cannot be turned on using control box buttons. Safety lock is automatically disabled when using the remote. While locked, outputs cannot be turned on from the control box, but latching outputs can be turned off. To unlock, press and hold both box switches for one second.

EXTERNAL BOX SWITCHES

External box switches are used to pair the ShurLink™ remotes, PRO and EZR™, to the control box. Internal access is NOT required.
