

ARM-LOCK™: ARM HOLD-DOWN

- Available for Dump Truck and Trailer Arm Systems
- All Pneumatic Hose and Hose Fittings are DOT Approved
- Rated for Operation in Temperatures Down to -40° F
- Hose Fittings are Push to Connect Style Fittings with Pre-Applied Thread Sealant to Allow for Reliable and Quick Leak Free Hose Connections
- Locking Mechanisms Actuate Using High-Quality Cylinders
- Manual Release is included, if Needed
- Compact Locking Mechanisms Feature HD All Steel Construction with Adjustable Mounting Brackets
- Remote Operated Locking System Secures Rear when System is Closed – Reduces Bouncing of Arms and Roller Bars During Travel
- Available Arm-Lok™ Kit (Pneumatic) P/N: 1125250 for Trucks, P/N 1125800 for Trailers

The Truck Kit has a complete pneumatic system powered by the truck's air supply by connecting to existing in-cab air accessories, manifolds, or by connecting directly to an air tank/reservoir. This kit's locking mechanisms are opened and closed utilizing a two position four-way pneumatic toggle valve inside the cab.

The Trailer Kit has an electric over pneumatic system powered by the truck's air supply by tapping into the trailers air supply and operated by a solenoid valve. This kit's locking mechanisms are opened and closed utilizing a four way electric solenoid valve operated by a toggle switch in the cab.
