

SHUR-CO®

SHUR-LOK® E-SERIES for Refuse & Chip Trailers

Engineered for the extreme demands of waste, recycling, and construction hauling, the Shur-Lok® E-Series for Refuse & Chip Trailers delivers unmatched durability, operational reliability, and installation efficiency. Designed with operator input and field tested, this system solves common failure points, keeping your fleet on the road, your loads protected, and your maintenance costs down.

Heavy-Gauge Roll-Tube to Motor Connector

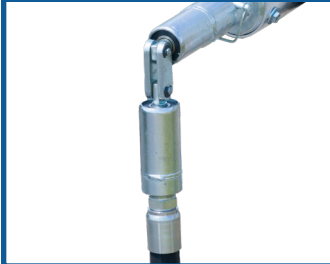

The heavy-gauge motor connection design secures the motor mount to the roll tube preventing the failure common in competitor systems.

Shur-Co Advantage

Robust Construction & Securement

Multi-Axis Rear Flex Arm Swivel (Patent Pending)

Smoother, increased range of motion ensures more reliable operation and prevents hose twisting, kinking and premature wear.

Shur-Co Advantage

Corrosion Resistant & Reliable

SMARTwire™ Sealed Harness Pre-Wired, Sealed Control Box

Patented sealed connections eliminate failures due to corroded or loose electrical terminals. Pre-wired, sealed control box with fully serviceable key components eliminates need for costly full replacement.

Shur-Co Advantage

Components Fully Serviceable

Patented Pivoting Motor Mount

Reduces stress on the motor shaft due to a bent or misaligned roll tube, eliminating motor shaft failures typical of competitive systems

Shur-Co Advantage

Eliminates Motor Shaft Stress

SHUR-LOK® E-SERIES FOR REFUSE & CHIP TRAILERS

1133235 3" Roll Tube

1133204 3.5" Roll Tube

Front Arm Kit W/Receiver and Wire	1133232
