

Tried and True Performance. Ready for What's Next.

Whether hauling rock, dirt, gravel, debris, silage or anything in between, IronSide2 helps side dump operators reduce downtime, improve safety, and simplify operation in demanding environments. Direct-drive technology, reinforced components, and a pivoting motor mount design deliver long-lasting reliability, while remote control and single-touch operation provide safer, more convenient tarp control from inside the cab.

Feature	Value
Direct-Drive Motor (Side Dump Specific)	Accommodates any size side dump trailer
Pivoting Motor Mount Design	Improved system durability and longer motor life
ShurLink™ Remote with Express Mode	Provides safer operation and faster tarp deployment
SMARTwire™ Sealed Connectors	Simplified, self-contained wiring eliminates corrosion and improves system reliability
Low Profile Arm Clearance	Reduces risk of arm damage and maximizes cab clearance
Riveted Roll Tube Splice Connection	Eliminates welded connection failure
Front or Rear Motor Mounting Options	Flexible installation across a variety of trailer configurations
Adjustable Heavy-Duty Spiral Torsion Spring	Delivers consistent tarp tension and smooth operation
Improved Traction Wheel	Enhances grip and tarp movement performance

Components

Motor

Direct-drive motor

Hex-through-bore design

Arm

Pivoting motor mount

Low-profile arm clearance

Powder-coated finish

Spring

Compact spring design

Powder-coated finish

SMARTwire™ Connections

Molded connections for trailer and motor

Traction Wheel

Molded traction wheel improves grip and tarp performance

Operation & Control

Rocker switch control (standard)

ShurLink wireless controls

Single-touch Express Mode functionality

Warranty

Arms - Lifetime

Motor - 3-year

Electrical components - 1-year

Tarp - 1-year
